Soalan 2/ Question 2

Rajah 2 menunjukkan perbezaan tahap dalam organisasi sel tumbuhan berkayu. Figure 2 shows different levels of cell organization in a woody plant.

Rajah 2
Figure 2

- (a) Nyatakan tahap organisasi sel yang ditunjukkan dalam P, Q dan R
State the level of cell organization represented by P, Q and R

P :

Q :

R :

Mengingat[2markah]

- (b) Namakan satu contoh S dan T
*Name **one** example of S and T*

S :

T :

Kefahaman[2 markah]

- (c) Namakan jenis pembahagian sel yang berlaku di dalam sel K untuk membentuk S
Name the type of cell division that occurs in the cell K to form S

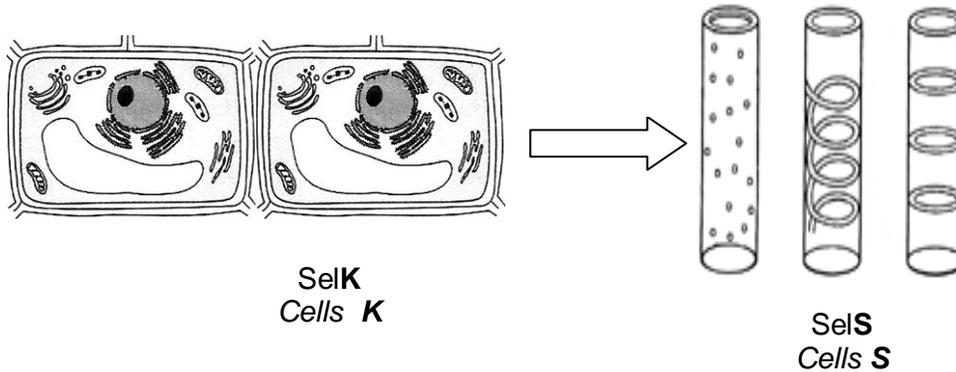

.....

Kefahaman[1 markah]

- (d) Nyatakan nombor kromosom di dalam sel soma tumbuhan berkayu
State the chromosomal number of a somatic cell in the woody plant.

.....

Kefahaman [1 markah]

Rajah 2
Diagram 2

- (e)(i) Nyatakan fungsi yang spesifik bagi xylem.
State the specific function of the xylem.

.....

Kefahaman [1 markah]

- (ii) Nyatakan dua struktur penyesuaian bagi xylem dan bagaimana ia membantu menjalankan fungsi dengan berkesan
Give two structural adaptations of xylem and how helps in carry out its function effectively.

.....
.....
.....
.....

Aplikasi[3markah]

- (f) Berikan pendapat anda, mengapa S berbeza daripada sel K berdasarkan struktur dan fungsinya.
Give your opinion why is S different from cell K based on the structure and its function.

.....
.....
.....

Aplikasi[2 markah]

No	Sec.	Accepted points / description / explanation	M 1	M Sum
2	(a)	P : Cell / sel Q : Organ R : System/ sistem	1 1 1	3
	(b)	S : Xylem vessels / tracheids T : Stem / root / leaf	1 1	2
	(c)	Mitosis	1	1
	(d)	44	1	1
	(f)(i)	Carries water and mineral salts from the roots to the stems and leaves // provides mechanical support. Membawa air dan mineral dari akar ke daun dan batang pokok // member sokongan mekanikal	1	1
	(f)(ii)	* The tissue consists of hollow vessels joined end to end // It has a continuous tube from the roots to the leaves. * The wall are thickened with lignin // It is strong.	1 1	2
	(e)	F : S Undergo cell specialization whereas K does not undergo cell specialization E : S Has specific shape / structure for specific function, K has basic shape	1 1	2
