HOUSEHOLD INCOME SURVEY REPORT

## JOHOR

## 2022

### Pemakluman

DOSM sedang menjalankan Banci Ekonomi pada tahun 2023. DOSM amat menghargai kerjasama daripada responden dalam memberikan maklumat kepada DOSM serta menjayakan banci ini. Sila layari [www.dosm.gov.my](http://www.dosm.gov.my) untuk maklumat lanjut.

DOSM telah melancarkan OpenDOSM NextGen sebagai medium yang menyediakan katalog data dan visualisasi bagi memudahkan pengguna menganalisis pelbagai data. OpenDOSM NextGen ialah platform perkongsian data sumber terbuka dan boleh diakses melalui portal <https://open.dosm.gov.my>.

Kerajaan Malaysia telah mengisytiharkan Hari Statistik Negara (MyStats Day) pada 20 Oktober setiap tahun. Tema sambutan MyStats Day adalah "Connecting the World with Data We Can Trust".

### Announcement

*DOSM is conducting the Economic Census in 2023. DOSM greatly appreciates the cooperation of respondents in providing information and ensuring the success of this census. Please visit [www.dosm.gov.my](http://www.dosm.gov.my) for more information.*

*DOSM has launched OpenDOSM NextGen as a medium that provides a catalogue of data and visualisation to facilitate users in analysing various data. OpenDOSM NextGen is an open source data sharing platform and accessible through <https://open.dosm.gov.my> portal.*

*The Government of Malaysia has declared National Statistics Day (MyStats Day) on October 20 each year. MyStats Day theme is "Connecting the World with Data We Can Trust".*

# PRAKATA

Laporan Survei Pendapatan Isi Rumah, Johor, 2022 diterbitkan oleh Jabatan Perangkaan Malaysia (DOSM) yang membentangkan statistik mengenai taburan pendapatan isi rumah di Johor. Statistik berkaitan pendapatan yang diterbitkan dalam laporan ini adalah berdasarkan konsep dan garis panduan daripada *Canberra Group Handbook on Household Income Statistics, Second Edition, 2011* yang diterbitkan oleh *United Nations*.

Statistik daripada survei ini merupakan maklumat penting yang digunakan oleh agensi kerajaan sebagai input dalam perancangan, pembentukan dan pemantauan pelan pembangunan negara. Statistik ini juga merupakan sumber rujukan bagi ahli ekonomi, ahli akademik, pihak swasta dan individu bagi tujuan penyelidikan dan penganalisan yang lebih terperinci.

Laporan ini mengandungi tiga bahagian utama. Bahagian pertama memaparkan penemuan utama dan ringkasan penemuan. Bahagian kedua pula menunjukkan statistik terperinci seperti statistik isi rumah, statistik pendapatan isi rumah kasar dan statistik pendapatan isi rumah boleh guna. Sementara itu, bahagian ketiga menerangkan aspek teknikal seperti konsep, definisi dan metodologi survei bagi memudahkan pengguna memahami statistik yang diterbitkan.

DOSM merakamkan setinggi-tinggi penghargaan kepada semua pihak yang telah menyumbang secara langsung dan tidak langsung dalam merealisasikan penerbitan ini. Setiap maklum balas dan cadangan daripada semua pihak untuk tujuan penambahbaikan laporan ini pada masa akan datang amat dihargai.

**DATO' SRI DR. MOHD UZIR MAHIDIN**

Ketua Perangkawan Malaysia

**Julai 2023**

# **PREFACE**

*The Household Income Survey Report, Johor, 2022 is published by the Department of Statistics Malaysia (DOSM) which presents statistics on the distribution of household income in Johor. Income-related statistics published in this report are based on concepts and guidelines from the Canberra Group Handbook on Household Income Statistics, Second Edition, 2011 published by the United Nations.*

*Statistics from this report provide pertinent information used by government agencies as input in the planning, formation and monitoring of national development plans. These statistics also serve as reference source for economists, academicians, private sectors and individuals for more detailed research and analysis purposes.*

*This report consists of three main parts. The first part presents the main findings and a summary of the findings. The second part includes detailed statistics, such as household statistics, household gross income statistics and household disposable income statistics. Meanwhile, the third part describes technical aspects such as concepts, definitions and survey methodology to facilitate users to better understand the published statistics.*

*DOSM gratefully acknowledges the cooperation rendered by all parties who have contributed directly and indirectly in realising this publication. Every feedback and suggestions from all parties towards improving this report in the future are highly appreciated.*

**DATO' SRI DR. MOHD UZIR MAHIDIN**

*Chief Statistician Malaysia*

## 1. PENGENALAN

Johor mempunyai keluasan tanah 19,165.9 kilometer persegi. Pada tahun 2022<sup>P</sup>, jumlah penduduk negeri Johor dianggarkan sebanyak 4,022.7 ribu di mana 70.1 peratus daripada penduduk berusia 15 hingga 64 tahun, 23.1 peratus dalam lingkungan 0 hingga 14 tahun dan 6.8 peratus penduduk berusia 65 tahun dan ke atas.

Sosioekonomi negara yang kukuh amat penting bagi menghasilkan kehidupan yang selesa dan harmoni. Justeru, perancangan dan pembangunan sosioekonomi perlu dilaksanakan dengan teratur dan berstrategi. Rancangan Malaysia Kedua Belas (RMKe-12) mencerminkan komitmen Kerajaan untuk mengembalikan kesejahteraan dan kemakmuran dengan meningkatkan kuasa beli rakyat, merapatkan jurang sosioekonomi dan memastikan kelestarian alam sekitar menjelang tahun 2025. Langkah ini adalah selari dengan hasrat Kerajaan untuk memastikan tiada rakyat Malaysia yang tercicir atau terpinggir dalam arus pembangunan. Dalam usaha mencapai matlamat, pertumbuhan dan kejayaan ekonomi perlu dizahirkan melalui tingkat pendapatan dan corak perbelanjaan isi rumah. Pendapatan merupakan satu proksi yang penting kepada pengukuran status sosioekonomi atau taraf hidup seseorang.

## 2. LATAR BELAKANG SURVEI

Bagi melihat kedudukan terkini taburan pendapatan isi rumah, kemiskinan dan jurang pendapatan terutamanya selepas pandemik, Jabatan Perangkaan Malaysia (DOSM) melaksanakan Survei Pendapatan Isi Rumah dan Kemudahan Asas (HIS & BA) pada tahun 2022. Survei ini dijalankan menggunakan kaedah persampelan kebarangkalian melalui pendekatan isi rumah yang mewakili 7.9 juta isi rumah warganegara Malaysia pada tahun 2022 dengan 999.4 ribu isi rumah di Johor. Sampel yang dipilih adalah berdasarkan kepada senarai isi rumah yang diperoleh daripada Banci Penduduk dan Perumahan yang dilaksanakan pada tahun 2020. Senarai ini dikemaskini secara berterusan oleh DOSM dan menjadi asas kepada rangka isi rumah yang menyeluruh meliputi semua negeri mengikut kawasan bandar dan luar bandar. Survei ini dilaksanakan melalui kaedah temu ramah bersemuka dan merupakan survei kali ke-20 setelah kali pertama dijalankan pada tahun 1974.

---

<sup>P</sup> Pemulaan

Laporan daripada survei ini akan menghuraikan taburan pendapatan isi rumah warganegara Malaysia bagi tahun 2022. Selain itu, penggunaan dapatan survei turut diperluas untuk kegunaan pelbagai dimensi kajian sosioekonomi yang lebih terperinci. Pelaksanaan survei ini adalah selaras dengan cadangan dan amalan di peringkat antarabangsa serta mengguna pakai saranan daripada *Canberra Group Handbook on Household Income Statistics, Second Edition*, yang diterbitkan oleh *United Nations* pada 2011.

### 3. PENEMUAN SURVEI

#### 3.1 CIRI-CIRI DEMOGRAFI

##### 3.1.1 Saiz Isi Rumah dan Bilangan Penerima Pendapatan

Konsep isi rumah dan pendapatan perlu difahami dalam memperihalkan statistik pendapatan isi rumah. Isi rumah merupakan seorang atau sekumpulan yang menetap bersama dalam satu tempat kediaman dan membuat peruntukan (perbelanjaan) untuk keperluan hidup bersama.

Secara umum, lebih daripada 90 peratus isi rumah adalah mereka yang bersaudara iaitu ahli keluarga. Contoh isi rumah dalam kalangan mereka yang tidak bersaudara pula adalah seperti sekumpulan pelajar atau mereka yang bekerja dan masih bujang yang menginap di rumah sewa. Sesebuah isi rumah dikategorikan sebagai isi rumah warganegara apabila ketua isi rumah tersebut berstatus warganegara. Pada tahun 2022, bilangan isi rumah di Johor adalah 1,041.6 ribu di mana 999.4 ribu merupakan isi rumah warganegara. Secara purata, saiz isi rumah di Johor adalah 3.7 orang berbanding 3.8 orang pada tahun 2019.

Dari segi peratusan, isi rumah yang tinggal berseorangan meliputi 7.5 peratus daripada keseluruhan isi rumah, berbanding 7.9 peratus pada tahun 2019. Isi rumah dengan dua orang ahli pula merangkumi 19.4 peratus. Sementara itu, isi rumah dengan tiga dan empat orang ahli masing-masing merangkumi 22.1 peratus dan 20.5 peratus, manakala isi rumah yang mempunyai lima orang ahli dan lebih meliputi 30.4 peratus.

Sebanyak 35.5 peratus isi rumah hanya mempunyai seorang penerima pendapatan di mana 17.0 peratus daripadanya merupakan isi rumah dengan empat orang ahli dan lebih. Sementara itu, sebanyak 43.7 peratus isi rumah mempunyai dua orang penerima pendapatan dan selebihnya mempunyai tiga orang penerima pendapatan (13.9%), empat orang penerima pendapatan dan lebih (6.9%) (**Jadual 1**).

**Jadual 1: Peratusan Isi Rumah Mengikut Saiz Isi Rumah dan Bilangan Penerima Pendapatan, Johor, 2019 dan 2022**

Saiz Isi Rumah (orang)	Bilangan Penerima Pendapatan (orang)											
	2019						2022					
	1	2	3	4	5 dan lebih	Jumlah	1	2	3	4	5 dan lebih	Jumlah
1	7.9					7.9	7.5					7.5
2	12.8	6.5				19.3	12.8	6.6				19.4
3	9.3	8.7	1.9			19.9	10.5	9.1	2.5			22.1
4	8.2	9.6	2.8	0.9		21.5	8.2	8.8	2.8	0.7		20.5
5 dan lebih	10.2	12.1	5.4	2.7	1.0	31.4	8.8	12.6	5.3	2.7	1.0	30.4
<b>Jumlah</b>	<b>48.4</b>	<b>36.9</b>	<b>10.1</b>	<b>3.6</b>	<b>1.0</b>	<b>100.0</b>	<b>35.5</b>	<b>43.7</b>	<b>13.9</b>	<b>5.2</b>	<b>1.7</b>	<b>100.0</b>

Nota: Jumlah mungkin berbeza kerana pembundaran.

## 3.2 PENDAPATAN ISI RUMAH

Pendapatan isi rumah merujuk kepada jumlah pendapatan yang diterima oleh ahli isi rumah, sama ada dalam bentuk tunai atau mata benda yang diperoleh secara berulang kali dan terakru (pasti diterima) sama ada secara mingguan, bulanan atau tahunan dan boleh digunakan bagi memenuhi keperluan hidup semasa. Pendapatan isi rumah dinilai berdasarkan nilai penengah dan purata. Pendapatan penengah ialah nilai pertengahan apabila pendapatan isi rumah disusun mengikut nilai terendah hingga nilai tertinggi. Konsep penengah penting bagi menjelaskan perubahan pendapatan isi rumah yang taburannya bersifat tidak normal. Pendapatan purata pula diperoleh dengan menjumlahkan semua pendapatan isi rumah dan dibahagikan dengan bilangan isi rumah.

### 3.2.1 Punca Pendapatan

Terdapat empat punca utama pendapatan bagi setiap pendapatan yang diterima oleh sesebuah isi rumah iaitu pendapatan yang diperoleh daripada pekerjaan bergaji, bekerja sendiri, pendapatan daripada harta & pelaburan yang dimiliki serta pendapatan yang diterima melalui pindahan semasa.

Pendapatan yang diperoleh daripada pekerjaan bergaji adalah meliputi semua pembayaran hasil penglibatan di dalam pekerjaan sama ada berbentuk wang tunai atau mata benda yang diterima oleh individu di dalam sesebuah isi rumah. Antara komponen pendapatan daripada pekerjaan bergaji ialah gaji yang diterima, elaun, bonus, makanan dan tempat tinggal yang diberikan secara percuma oleh majikan.

Pendapatan daripada bekerja sendiri pula adalah pendapatan yang diperoleh di kalangan mereka yang merupakan majikan yang mempunyai pekerja atau mereka yang bekerja sendiri sama ada secara berdaftar atau tidak berdaftar. Keuntungan daripada pelaburan modal rakan kongsi yang tidak bekerja di perusahaan ini adalah tidak termasuk sebagai bekerja sendiri.

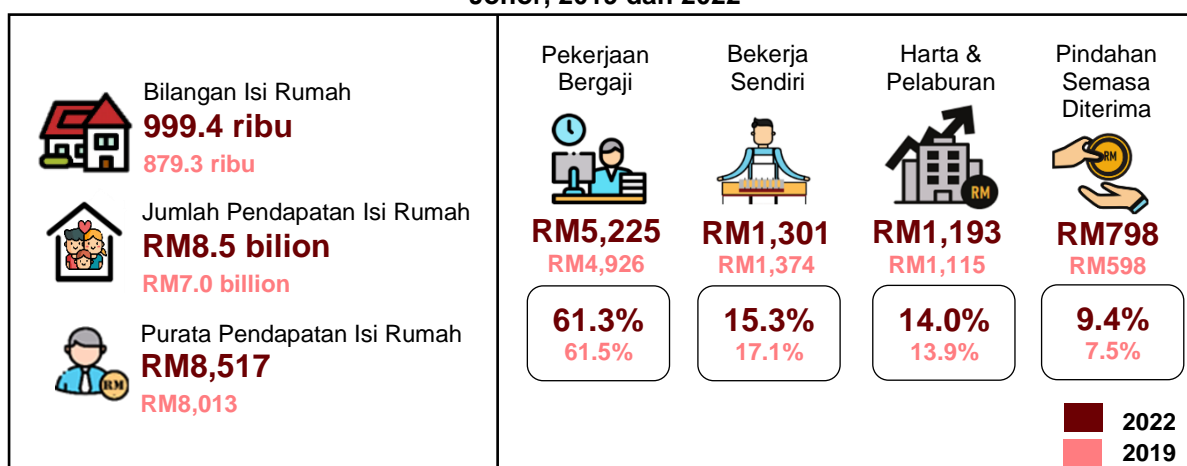

Pendapatan daripada harta & pelaburan ialah pendapatan yang diperoleh daripada pemilikan aset yang disediakan untuk kegunaan orang lain. Pendapatan daripada sewaan rumah, bangunan komersial atau sewaan tanah merupakan antara contoh pendapatan daripada harta manakala pendapatan daripada pelaburan ialah seperti faedah dan dividen daripada simpanan.

Pendapatan daripada pindahan semasa diterima boleh terdiri dalam bentuk wang tunai, barangan atau perkhidmatan dan boleh diterima daripada isi rumah lain, kerajaan atau badan-badan kebajikan sama ada dari dalam atau luar negara. Kiriman wang daripada isi rumah lain, pencen, nafkah dan bantuan yang diterima secara berkala adalah antara contoh pendapatan daripada pindahan semasa diterima.

Namun yang begitu, penerimaan secara sekali gus (*lump sum*) seperti bayaran persaraan, pengeluaran Kumpulan Wang Simpanan Pekerja (KWSP) dan lain-lain penerimaan hasil daripada kerja yang dilakukan sebelum bersara tidak dianggap sebagai pendapatan kecuali isi rumah terbabit tidak mempunyai punca pendapatan lain. Dalam kes-kes sebegini, pendapatan yang diambil kira adalah amaun yang sama dengan jumlah perbelanjaan yang dibuat oleh isi rumah tersebut bagi tempoh dirujuk.

Dapatan survei menunjukkan sebanyak 61.3 peratus pendapatan isi rumah diperoleh daripada pekerjaan bergaji. Pendapatan daripada bekerja sendiri pula menyumbang 15.3 peratus diikuti oleh pendapatan daripada harta & pelaburan (14.0%) dan pendapatan melalui pindahan semasa diterima (9.4%) **(Paparan 1)**.

**Paparan 1: Pendapatan Isi Rumah Kasar Bulanan Purata mengikut Punca Pendapatan, Johor, 2019 dan 2022**

Pendapatan mengikut punca juga boleh dijadikan sebagai rujukan bagi memperkasa pemantauan bantuan kerajaan kepada golongan sasar. Pendapatan daripada pindahan semasa diterima bagi isi rumah berpendapatan kurang daripada RM2,000 merekodkan peningkatan dari 42.3 peratus pada tahun 2019 kepada 45.0 peratus pada tahun 2022. Jumlah peratusan ini turut meningkat pada tahun 2022 (9.4%) menunjukkan bahawa isi rumah ini juga bergantung kepada pindahan semasa diterima terutamanya semasa fasa endemik COVID-19. Selain itu, pindahan semasa juga adalah signifikan terutamanya bagi isi rumah daripada kelas pendapatan antara RM2,000 hingga RM3,999 dan antara RM4,000 hingga RM5,999 iaitu masing-masing sebanyak 24.5 peratus dan 16.5 peratus. Secara keseluruhannya, peratusan pindahan semasa diterima bagi isi rumah dalam kelas pendapatan yang lebih tinggi adalah berkurang, sekali gus menunjukkan tahap kebergantungan yang semakin rendah terhadap pindahan semasa diterima bagi kumpulan tersebut (**Jadual 2**).

Jadual 2: Peratusan Pendapatan mengikut Punca dan Kelas Pendapatan, Johor, 2019 dan 2022

Kelas Pendapatan (RM)	2019				2022			
	Pekerjaan Bergaji (%)	Bekerja Sendiri (%)	Harta & Pelaburan (%)	Pindahan Semasa Diterima (%)	Pekerjaan Bergaji (%)	Bekerja Sendiri (%)	Harta & Pelaburan (%)	Pindahan Semasa Diterima (%)
<b>Jumlah</b>	<b>61.5</b>	<b>17.1</b>	<b>13.9</b>	<b>7.5</b>	<b>61.3</b>	<b>15.3</b>	<b>14.0</b>	<b>9.4</b>
Kurang daripada 2,000	14.0	14.5	29.3	42.3	14.1	13.7	27.2	45.0
2,000 - 3,999	45.0	16.5	17.6	20.9	45.1	12.8	17.5	24.5
4,000 - 5,999	56.7	16.2	15.0	12.0	56.5	11.4	15.6	16.5
6,000 - 7,999	62.9	15.2	13.8	8.1	60.0	12.1	15.0	12.8
8,000 - 9,999	63.8	15.1	13.9	7.1	65.9	12.0	13.8	8.3
10,000 - 11,999	66.7	16.0	13.2	4.1	64.8	12.7	14.0	8.4
12,000 - 13,999	66.3	17.0	13.1	3.7	68.1	13.0	13.6	5.3
14,000 - 15,999	71.4	14.0	11.3	3.3	69.5	12.3	13.0	5.2
16,000 - 17,999	66.8	17.0	12.9	3.2	69.8	13.2	12.6	4.4
18,000 - 19,999	65.8	19.4	11.9	2.9	64.5	17.1	12.6	5.8
20,000 dan ke atas	57.1	28.9	11.7	2.3	57.1	28.9	11.7	2.3

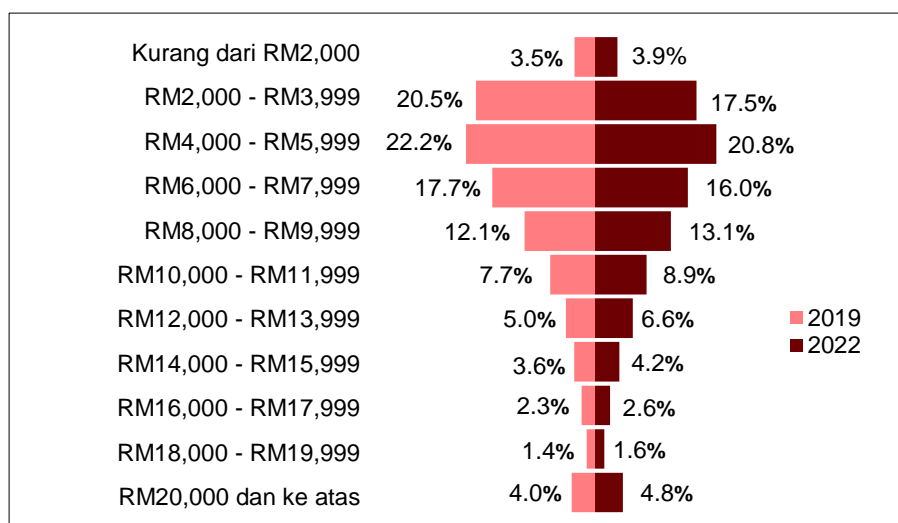

Nota: Jumlah mungkin berbeza kerana pembundaran.

### 3.2.2 Pendapatan Isi Rumah Kasar

Pendapatan isi rumah kasar bulanan dinilai berdasarkan nilai penengah dan purata. Pada tahun 2022, pendapatan isi rumah bulanan penengah di Johor adalah RM6,879 manakala pendapatan purata adalah RM8,517. Dari sudut pertumbuhan pula, pendapatan penengah meningkat 2.3 peratus setahun pada tahun 2022 berbanding 4.3 peratus pada tahun 2019. Pendapatan purata turut menunjukkan peningkatan pada tahun 2022 dengan kadar pertumbuhan 2.0 peratus berbanding 4.8 peratus pada tahun 2019. Umumnya, situasi ini adalah selari dengan situasi kebanyakan negeri lain di mana ianya menggambarkan ketidaksamarataan pendapatan isi rumah yang dipengaruhi oleh sekelompok isi rumah berpendapatan tinggi.

Dapatan survei menunjukkan 21.4 peratus isi rumah di Johor masih berpendapatan di bawah RM4,000 dengan sebahagian besarnya berada dalam kelas RM2,000 hingga RM3,999 sebanyak 17.5 peratus (**Carta 1**).

**Carta 1: Peratusan Isi Rumah mengikut Kelas Pendapatan Isi Rumah Kasar, Johor, 2019 dan 2022**

### 3.2.2.1 Pendapatan Isi Rumah Kasar mengikut Daerah Pentadbiran

Johor Bahru mencatatkan pendapatan penengah tertinggi iaitu RM8,232 diikuti dengan Kulai (RM7,460). Sementara itu, daerah pentadbiran lain merekodkan pendapatan penengah di bawah paras negeri iaitu RM6,879.

Mersing mencatatkan peningkatan tertinggi kadar pertumbuhan tahunan bagi pendapatan penengah sebanyak 4.4 peratus dalam tempoh 2019 hingga 2022 diikuti oleh Kota Tinggi (4.3%) dan Johor Bahru (3.8%) (**Carta 2**).

**Carta 2: Pendapatan Isi Rumah Kasar Penengah mengikut Daerah Pentadbiran, Johor, 2019 dan 2022**

CAGR (%)	2019 (RM)		2022 (RM)	CAGR (%)
4.0	7,342	Johor Bahru	8,232	3.8
7.0	7,536	Kulai	7,460	(0.3)
<b>4.3</b>	<b>6,427</b>	<b>JOHOR</b>	<b>6,879</b>	<b>2.3</b>
5.5	6,504	Batu Pahat	6,347	(0.8)

7.5	4,933	Kluang	5,204	1.8
3.2	3,896	Mersing	4,445	4.4

CAGR: Kadar Pertumbuhan Tahunan Dikompaun  
Susunan mengikut nilai penengah tertinggi 2022

Secara purata pula, Johor Bahru mencatatkan pendapatan purata tertinggi iaitu RM9,869 dan diikuti dengan Kulai (RM9,177). Sementara itu, daerah pentadbiran lain merekodkan pendapatan purata di bawah paras negeri (RM8,517). Pendapatan purata bagi semua daerah pentadbiran telah meningkat.

Terdapat lima daerah pentadbiran yang mencatatkan kadar purata pertumbuhan melebihi kadar purata pertumbuhan negeri (2.0%). Mersing merekodkan peningkatan kadar tertinggi sebanyak 3.1 peratus diikuti oleh Kluang (2.7%), Kota Tinggi (2.5%), Kulai (2.2%) dan Tangkak (2.1%) (**Carta 3**).

**Carta 3: Pendapatan Isi Rumah Kasar Purata mengikut Daerah Pentadbiran, Johor, 2019 dan 2022**

CAGR (%)	2019 (RM)		2022 (RM)	CAGR (%)
4.3	9,315	Johor Bahru	9,869	1.9
7.3	8,602	Kulai	9,177	2.2
<b>4.8</b>	<b>8,013</b>	<b>JOHOR</b>	<b>8,517</b>	<b>2.0</b>

Susunan mengikut nilai purata tertinggi 2022

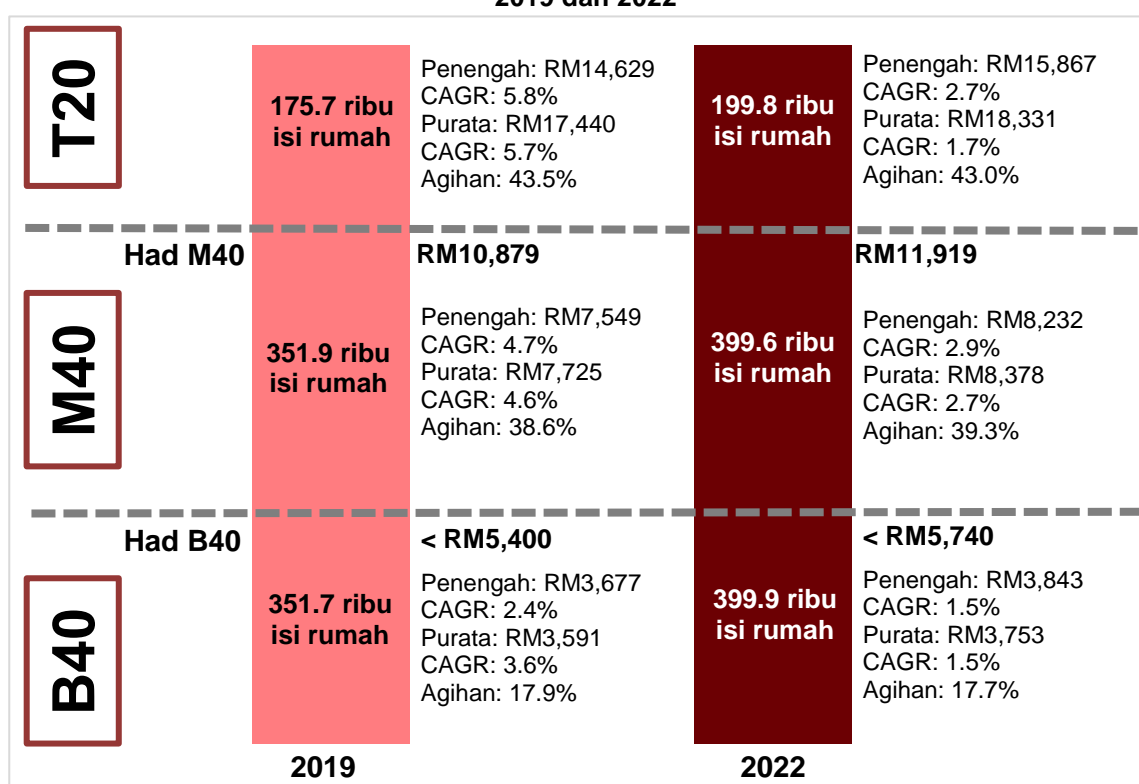

### 3.2.2.2 Pendapatan Isi Rumah Kasar mengikut Kumpulan Isi Rumah

RMKe-12 yang telah diterapkan oleh Kerajaan memberi tumpuan yang lebih untuk menangani kemiskinan dan keterangkuman selaras dengan prinsip tiada sesiapa yang tertinggal, dalam mencapai taraf hidup yang wajar dan memastikan keadilan sosial. Strategi ini menyokong komitmen untuk menjadikan Malaysia sebuah negara yang maju dan makmur dengan pengagihan kekayaan yang adil dan saksama merentas kumpulan pendapatan, etnik dan rantaian bekalan.

Hasil dapatan daripada survei 2022 menunjukkan had pendapatan bagi kumpulan Terendah 40 peratus (B40) pada tahun 2022 yang merangkumi 399.9 ribu isi rumah adalah RM5,739. Had pendapatan kumpulan Pertengahan 40 peratus (M40) yang melibatkan 399.6 ribu isi rumah pula adalah di antara RM5,740 hingga RM11,919. Sementara itu, sebanyak 199.8 ribu isi rumah berada di kumpulan Tertinggi 20 peratus (T20) dengan pendapatan melebihi RM11,919. Dari segi agihan pendapatan, T20 memiliki 43.0 peratus dari jumlah pendapatan isi rumah berbanding 43.5 peratus pada tahun 2019. Sementara itu, 39.3 peratus dimiliki oleh kumpulan M40 dan selebihnya 17.7 peratus daripada jumlah pendapatan adalah untuk kumpulan B40 (**Paparan 2**).

**Paparan 2: Struktur Pendapatan Mengikut Kumpulan Isi Rumah, Johor  
2019 dan 2022**

Selain itu, dapatan survei juga menunjukkan pendapatan purata isi rumah B40 adalah sedikit rendah berbanding pendapatan penengah. Hal ini menunjukkan agihan pendapatan di dalam kumpulan isi rumah B40 adalah pencong negatif atau pencong ke kiri di mana kebanyakan isi rumah berpendapatan rendah mempengaruhi nilai pendapatan purata. Situasi ini berbeza bagi kumpulan isi rumah M40 dan T20 di mana masing-masing merekodkan pendapatan purata lebih tinggi daripada pendapatan penengah. Isi rumah M40 mencatatkan pendapatan purata sebanyak RM8,378 manakala pendapatan penengah adalah sebanyak RM8,232. Isi rumah T20 pula merekodkan pendapatan purata dan pendapatan penengah masing-masing sebanyak RM18,331 dan RM15,867. Dapatan ini menunjukkan agihan

pendapatan bersifat pencong positif atau pencong ke kanan di mana pendapatan isi rumah kebanyakannya terkumpul di bahagian kiri agihan dan sebilangan kecil isi rumah mempunyai pendapatan yang lebih tinggi menyebabkan pendapatan penengah adalah lebih rendah daripada pendapatan purata.

B40 diperincikan kepada B1, B2, B3 dan B4; M40 kepada M1, M2, M3 dan M4; dan T20 kepada T1 dan T2. Berdasarkan kepada kelompok desil isi rumah ini, agihan pendapatan daripada kumpulan B40 yang menguasai 17.7 peratus agihan pendapatan merupakan perincian daripada B1 yang memiliki 2.5 peratus daripada jumlah pendapatan, B2 (3.9%), B3 (5.1%) dan B4 (6.2%). Begitu juga M40, yang mana daripada jumlah agihan 39.3 peratus, M1 hanya menguasai 7.4 peratus, sementara M4 menguasai 12.6 peratus daripada jumlah pendapatan. Namun begitu, penelitian pengkelasan isi rumah dan agihan pendapatan sebegini perlu turut mengambil kira saiz isi rumah bagi setiap kelompok (**Jadual 3**).

**Jadual 3: Agihan Pendapatan, Pendapatan Isi Rumah Penengah, Purata dan Had Pendapatan mengikut Kumpulan Isi Rumah Desil, Johor, 2022**

Kumpulan Desil		Agihan Pendapatan (%)	Pendapatan Isi Rumah Penengah (RM)	Pendapatan Isi Rumah Purata (RM)	Had Pendapatan (RM)
T20	T2	27.2	19,685	23,206	15,400 dan ke atas
	T1	15.8	13,383	13,462	11,920 - 15,399
M40	M4	12.6	10,680	10,741	9,740 - 11,919
	M3	10.5	8,918	8,940	8,230 - 9,739
	M2	8.8	7,487	7,521	6,880 - 8,229
	M1	7.4	6,308	6,307	5,740 - 6,879
B40	B4	6.2	5,243	5,246	4,770 - 5,739
	B3	5.1	4,337	4,333	3,840 - 4,769
	B2	3.9	3,327	3,333	2,800 - 3,839
	B1	2.5	2,183	2,098	Kurang daripada 2,800

### 3.2.3 Pendapatan Isi Rumah Boleh Guna

Pendapatan boleh guna merujuk kepada jumlah pendapatan selepas ditolak bayaran pindahan semasa termasuklah bayaran wajib yang dikenakan ke atas isi rumah seperti cukai, zakat dan caruman kepada skim keselamatan sosial. Pendapatan boleh guna ini juga merupakan salah satu ukuran pilihan bagi analisis agihan pendapatan kerana pendapatan ini adalah pendapatan isi rumah yang masih ada untuk dibelanjakan ke atas perbelanjaan penggunaan dan untuk simpanan semasa di dalam tempoh rujukan.

Berdasarkan dapatan survei 2022, pendapatan boleh guna penengah mencatatkan kadar pertumbuhan 2.2 peratus kepada RM5,899 berbanding RM5,516 pada tahun 2019 (**Carta 4**). Sementara itu, pendapatan boleh guna purata adalah RM7,251 meningkat dengan kadar pertumbuhan 1.5 peratus daripada RM6,923 pada tahun 2019. Pendapatan boleh guna purata meliputi 85.1 peratus daripada jumlah pendapatan kasar purata (**Carta 5**).

**Carta 4: Pendapatan Isi Rumah Boleh Guna Penengah mengikut Daerah Pentadbiran, Johor, 2019 dan 2022**

CAGR (%)	2019 (RM)		2022 (RM)	CAGR (%)
4.3	6,202	Johor Bahru	6,828	1.9
7.3	6,069	Kulai	6,364	2.2

Susunan mengikut nilai purata tertinggi 2022

### 3.3 KETIDAKSAMARATAAN PENDAPATAN

Kemakmuran ekonomi sesebuah negara yang dapat dinikmati bersama oleh semua pihak dalam sesebuah negara merupakan antara elemen penting ke arah pewujudan sebuah negara yang maju dan makmur. Pengagihan ekonomi secara sama rata sering kali dihubungkan dengan faktor ketidaksamarataan. Ketidaksamarataan ini wujud apabila berlakunya perbezaan keupayaan antara isi rumah bagi merebut peluang pendapatan. Stiglitz (2016)<sup>1</sup> membangkitkan perkaitan bahawa ketidaksamarataan akan memperlambatkan perkembangan ekonomi. Menurut Stiglitz, ketidaksamarataan akan melemahkan permintaan agregat individu yang berada di kumpulan terbawah di mana individu ini akan membelanjakan keseluruhan pendapatannya bagi mendapatkan barangan asas.

Namun begitu, kemudahan dan perkhidmatan yang disediakan oleh kerajaan yang digunakan secara kolektif oleh masyarakat seperti pendidikan, kesihatan dan kemudahan keselamatan boleh merapatkan jurang pendapatan di kalangan isi rumah. Walau bagaimanapun, perkhidmatan dan kemudahan ini tidak diambil kira sebagai sebahagian daripada nilai pendapatan isi rumah.

Ketidaksamarataan pendapatan boleh diukur dengan menggunakan pelbagai kaedah. Antara kaedah yang paling popular adalah dengan menggunakan pekali Gini. Pekali Gini ini merujuk kepada pengukuran pemusatan pendapatan menggunakan keluk Lorenz di mana nilai pekali Gini berada di antara 0 dan 1. Semakin kecil nilainya semakin saksama agihan pendapatan.

Penemuan 2022 menunjukkan nilai pekali Gini yang dikira berdasarkan pendapatan kasar adalah sama bagi tahun 2019 dan 2022 iaitu 0.366. Bagi tempoh tersebut, pekali Gini di kawasan bandar dan luar bandar menurun masing-masing daripada 0.365 dan 0.356 kepada 0.364 dan 0.339. Pekali Gini juga boleh diukur berdasarkan pendapatan boleh guna. Melalui kaedah ini, nilai pekali Gini menurun dengan mata peratus 0.1 daripada 0.365 (2019) kepada 0.364 (2022). Dari segi nilai, pekali Gini yang dikira berdasarkan pendapatan boleh guna menunjukkan angka lebih rendah berbanding berdasarkan pendapatan kasar. Ini menggambarkan bahawa sistem percukaian dan pembayaran cukai oleh mereka yang berkecukupan dapat membantu merapatkan jurang pendapatan antara isi rumah.

<sup>1</sup> Stiglitz, J.E. (2019). *Inequality and economic growth*

### **3.4 KEMISKINAN**

Secara umumnya, sebagaimana pekali Gini, kemiskinan juga boleh diukur dengan pelbagai kaedah termasuklah kaedah pengukuran kemiskinan mutlak, kemiskinan relatif dan Indeks Kemiskinan Pelbagai Dimensi (MPI). Antara yang sering digunakan oleh kebanyakan negara adalah pengukuran kemiskinan mutlak.

#### **3.4.1 Kemiskinan Mutlak**

Di Malaysia, kaedah pengukuran kemiskinan mutlak ini telah dilaksanakan sejak 1977 lagi dengan menggunakan pendekatan Kos Keperluan Asas. Melalui kaedah ini satu paras keperluan minimum yang dikenali sebagai Pendapatan Garis Kemiskinan (PGK) telah ditetapkan. Komponen PGK ini terdiri daripada dua kategori iaitu PGK makanan dan PGK bukan makanan. Nilai PGK makanan diperoleh melalui penetapan keperluan kalori bagi sesebuah isi rumah.

Nilai PGK bukan makanan pula ditentukan berdasarkan kepada corak perbelanjaan dan keperluan asas isi rumah berpendapatan rendah yang diperoleh melalui Survei Perbelanjaan Isi Rumah (HES). Jumlah PGK adalah hasil tambah PGK makanan dan bukan makanan. Sesebuah isi rumah dikategorikan sebagai miskin mutlak jika pendapatan keseluruhan isi rumahnya berada di bawah paras nilai PGK manakala isi rumah dikategorikan sebagai miskin tegar jika pendapatan keseluruhan isi rumahnya berada di bawah paras nilai PGK makanan.

Pada tahun 2022, nilai purata PGK di peringkat negeri Johor ialah RM2,627 sebulan manakala purata nilai PGK makanan adalah RM1,161 sebulan dengan purata saiz isi rumah seramai 3.7 orang. Nilai purata PGK ini diperoleh dengan menambahkan kesemua nilai PGK bagi setiap isi rumah dan dibahagikan dengan bilangan keseluruhan isi rumah di Johor. Insiden kemiskinan mutlak negeri Johor meningkat daripada 3.9 peratus pada tahun 2019 kepada 4.6 peratus. Dalam tempoh yang sama, insiden kemiskinan mutlak di bandar dan luar bandar turut mencatatkan peningkatan masing-masing kepada 4.2 peratus dan 6.1 peratus. Sementara itu kemiskinan tegar direkodkan sebanyak 0.1 peratus pada tahun 2022 berbanding 0.2 peratus pada tahun 2019.

### **3.4.2 Kemiskinan Relatif**

Kemiskinan relatif merujuk kepada kaedah pengukuran di mana pendapatan sesebuah isi rumah dibandingkan dengan suatu keadaan taraf hidup yang ditetapkan dalam masyarakat. Berbanding dengan kemiskinan mutlak had kemiskinan relatif tidak diukur menggunakan PGK, sebaliknya ianya ditentukan berdasarkan kepada separuh daripada pendapatan penengah keseluruhan isi rumah pada tahun berkaitan.

Sesebuah isi rumah dikategorikan sebagai miskin relatif jika pendapatan isi rumahnya berada di bawah had kemiskinan relatif. Had kemiskinan relatif ini bergantung kepada bentuk taburan semasa pendapatan isi rumah pada tahun rujukan. Survei ini mendapati nilai kemiskinan relatif pada 2022 adalah 15.9 peratus berbanding 15.3 peratus pada tahun 2019.

## **1. INTRODUCTION**

*Johor has an area of 19,165.9 square kilometres. In 2022<sup>P</sup>, the total population of Johor is estimated at 4,022.7 thousand where 70.1 per cent of the population is 15 to 64 years old, 23.1 per cent is between 0 to 14 years old and 6.8 per cent of the population aged 65 years and above.*

*Strong socioeconomics of a country is crucial for a comfortable and harmonious life. Therefore, socioeconomic planning and development need to be organized and strategically implemented. The Twelfth Malaysia Plan (Twelfth Plan) reflects the Government's commitment to restore the well-being and prosperity of people by increasing the purchasing power, narrowing existing socioeconomic disparities and ensuring environmental sustainability by 2025. This measure is in line with the Government's aspiration in ensuring that no one is left behind or neglected in development. To achieve this goal, the economic growth and success must be reflected in the level of income and the pattern of household expenditure. Income is an important proxy for measuring socioeconomic status or well-being of an individual.*

## **2. SURVEY BACKGROUND**

*In assessing the current situation of household income distribution, poverty and income disparity especially post pandemic, the Department of Statistics Malaysia (DOSM) conducted the Household Income and Basic Amenities (HIS & BA) Survey in 2022. This survey was conducted using a probability sampling that represents 7.9 million Malaysian households in 2022, with 999.4 thousand household in Johor. The selected sample was based on a list of households obtained from the Population and Housing Census conducted in 2020. This list is continuously updated by DOSM and become the basis for a comprehensive household frame covering all states according to urban and rural areas. This survey was carried out through a face-to-face interview and was the 20<sup>th</sup> survey after the inaugural survey in 1974.*

---

<sup>P</sup> Preliminary

The report from this survey describes the distribution of Malaysian household income throughout the year 2022. In addition, the usage of the findings has been expanded to various dimensions of socioeconomic research. The survey is in tandem with international practices as well as in accordance with the recommendations from the Canberra Group Handbook on Household Income Statistics, Second Edition, that was published by the United Nations in 2011.

### **3. SURVEY FINDINGS**

#### **3.1 CHARACTERISTICS ON DEMOGRAPHY**

##### **3.1.1 Household Size and Number of Income Recipient**

The concept of household and income need to be understood in defining household income statistics. A household refers to a person or a group of persons who live together in a dwelling and make provisions (expenses) for essentials of living together.

In general, more than 90 per cent of households are those whom are related to each other: i.e. family membership. Examples of households whom are unrelated to each other are a group of students or those who are working and not married and live together in a rented house. A household is categorised as Malaysian household when the household head is a Malaysian citizen. In 2022, the number of households in Johor was 1041.6 thousand where 999.4 thousand are Malaysians. On average, household size in Johor was 3.7 persons as compared to 3.8 persons in 2019.

In terms of percentage, single households comprised 7.5 per cent of all households, as compared to 7.9 per cent in 2019. Households with two members comprised 19.4 per cent. Meanwhile, households with three and four members comprised 22.1 per cent and 20.5 per cent respectively, while households with five members and more comprised 30.4 per cent.

A total of 35.5 per cent of households had only one income recipient of which 17.0 per cent were households with four members and more. Meanwhile, 43.7 per cent of households had two income recipients and the remaining had three income recipients (13.9%), four and more income recipients (6.9%) (**Table 1**).

**Table 1: Percentage of Households by Household Size and Number of Income Recipients, Johor, 2019 and 2022**

Note: Total may differ due to rounding.

## 3.2 HOUSEHOLD INCOME

Household income refers to the amount of income received by household members, whether in the form of cash or in-kind that is earned at frequent intervals and accrued (guaranteed) either on a weekly, monthly or yearly and are available for current consumption. Household income was assessed based on median and mean values. Median income refers to the middle value when income is arranged ascendingly from the lowest value to the highest value. The concept of median explains the non-normal distribution of household income. Mean income is defined by the value obtained by dividing total income with number of households.

### 3.2.1 Sources of Income

There are four main sources of income received by a household, which is income obtained from paid employment, self-employment, income from property & investments owned and current transfers received.

Income from paid employment comprises all payments received whether monetary or in-kind received by individuals in a household resulting from their involvement in employment. The wages received, allowance, bonus and free food and accommodation provided by the employer are among the components of income obtained from paid employment.

Income from self-employment is described by income obtained by those who employs workers or those who are self-employed either registered or unregistered. Income from self-employment excludes profits from the capital investment of partners who do not work in these enterprises.

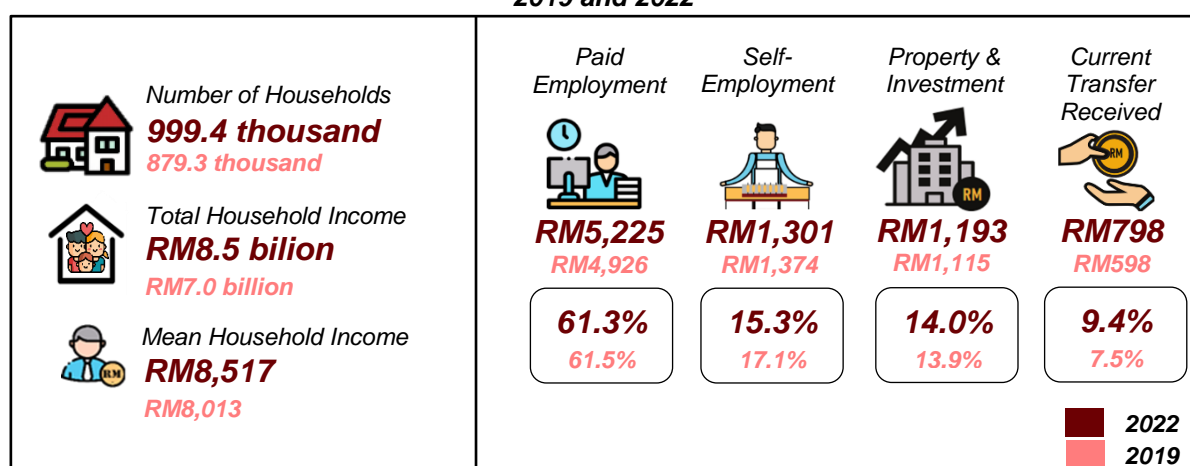

Income from property & investment is defined as receipts that arise from the ownership of assets provided to others for their use. For example, income from rental such as houses, commercial buildings or land while income from investment includes interest and dividends from savings.

Income from current transfer received can consist of cash, goods or services and may be received from other households, the government or charities, both within or outside the country. Remittances, pensions, alimony and other assistance received periodically are among examples of income from current transfers received.

However, lump sum receipts such as retirement payments, Employee Provident Fund (EPF) withdrawals and other receipts of remuneration from work before retirement were not considered as income unless the household involved has no other source of income. In such cases, the income considered was the similar amount as the total consumption made by the household during the reference period.

The survey findings showed that 61.3 per cent of the total household income was derived from paid employment. Income from self-employment accounted for 15.3 per cent followed by income from property & investment (14.0%) and income from current transfer received (9.4%). (Exhibit 1).

**Exhibit 1: Mean of Monthly Household Gross Income by Sources of Income, Johor, 2019 and 2022**

Sources of income can also serve as a guideline to strengthen the monitoring of government's assistance to targeted group. Income from current transfers received by households with income lower than RM2,000 recorded an increase from 42.3 per cent in 2019 to 45.0 per cent in 2022. The total percentage also increased in 2022 (9.4%) indicates that these households were highly dependent on current transfer received particularly during the endemic phase of COVID-19. Besides, this current transfer is also significant for households in income class between RM2,000 to RM3,999 and between RM4,000 to RM5,999 which registered 24.5 per cent and 16.5 per cent, respectively. Overall, the percentage of current transfers received decreased in higher income bracket, thus indicates less dependency on current transfers received for the said group (Table 2).

**Table 2: Percentage of Income by Sources of Income and Income Class, Johor, 2019 and 2022**

Income Class (RM)	2019				2022			
	Paid Employment (%)	Self-Employment (%)	Property & Investment (%)	Current Transfer Received (%)	Paid Employment (%)	Self-Employment (%)	Property & Investment (%)	Current Transfer Received (%)
<b>Total</b>	<b>61.5</b>	<b>17.1</b>	<b>13.9</b>	<b>7.5</b>	<b>61.3</b>	<b>15.3</b>	<b>14.0</b>	<b>9.4</b>

Note: Total may differ due to rounding

### 3.2.2 Household Gross Income

Monthly household gross income is valued by its median and mean values. In 2022, monthly median household income in Johor was RM6,879 while the mean income was RM8,517. In terms of growth, median income increased by 2.3 per cent annually in 2022 as compared to 4.3 per cent in 2019. Mean income also shows a rise in 2022 with a growth rate of 2.0 per cent as compared to 4.8 per cent in 2019. Generally, this situation is in line with the situation in most of other states where it pictures the inequality of household income that is influenced by a group of high-income households.

The survey shows that 21.4 per cent of households in Johor earn below RM4,000 with 17.5 per cent in income range RM2,000 until RM3,999 (**Chart 1**).

**Chart 1: Percentage of Households by Household Gross Income Class, Johor, 2019 and 2022**

### 3.2.2.1 Household Gross Income by Administrative District

Johor Bahru recorded the highest median income of RM8,232 followed by Kulai (RM7,460). Meanwhile, other administrative districts recorded median income below the state level of RM6,879.

Mersing recorded the highest annual growth rate of median income by 4.4 per cent during the period of 2019 to 2022, followed by Kota Tinggi (4.3%) and Johor Bahru (3.8%) (**Chart 2**).

**Chart 2: Median of Household Gross Income by Administrative District, Johor, 2019 and 2022**

CAGR (%)	2019 (RM)		2022 (RM)	CAGR (%)

3.2	3,896	Mersing	4,445	4.4

CAGR: Compounded Annual Growth Rate  
Ranked according to highest median value 2022

In terms of mean, Johor Bahru recorded the highest mean income of RM9,869 followed by Kulai (RM9,177). Meanwhile, other administrative districts recorded mean monthly income below the state level (RM8,517). Mean income for all administrative districts increased.

There were five administrative districts surpassed the state compounded annual growth (2.0%). Mersing recorded the highest increment at rate of 3.1 per cent followed by Kluang (2.7%), Kota Tinggi (2.5%), Kulai (2.2%) and Tangkak (2.1%) (Chart 3).

**Chart 3: Mean of Household Gross Income by Administrative District, Johor, 2019 and 2022**

### 3.2.2.2 Household Gross Income by Household Group

The Twelfth Plan incorporated by Government lays emphasis on addressing poverty and inclusivity consistent with the principle of leaving no one behind, in achieving a decent standard of living and ensuring social justice. This strategy supports the commitment for Malaysia to be a developed and prosperous nation, with fair and equitable wealth distribution across income groups, ethnicities and supply chains.

The findings from the 2022 survey showed the income threshold consisting 399.9 thousand households of the Bottom 40 per cent (B40) group was RM5,739. The Middle 40 per cent (M40) group's income threshold involving 399.6 thousand households were between RM5,740 to RM1,919. In addition, there were 199.8 thousand households in Top 20 per cent (T20) group with income more than RM11,919. In terms of income distribution, the T20 constituted 43.0 per cent of total household income as compared to 43.5 per cent in 2019. Meanwhile, 39.3 per cent belongs to M40 and the remainder 17.7 per cent were for B40 (**Exhibit 2**).

**Exhibit 2: Income Structure by Household Group, Johor, 2019 and 2022**

From these findings, it showed that mean income of B40 households lies below its median income. This implies that income distribution within the B40 group is negatively skewed or skewed to the left of which a larger proportion of lower-income households had pushed down the mean income value. This situation is different for the M40 and T20 groups where each recorded mean income above the median income. The M40 group had mean income of RM8,378 while median income as RM8,232. The T20 group recorded its mean and median income of RM18,331 and RM15,867, respectively. These findings indicate that income distribution is positively skewed or skewed to the right where households' incomes mostly clustered towards the left side of the distribution and a small number of households have higher incomes resulting the median income to be lower than the mean income.

The B40 was further classified to B1, B2, B3 and B4; M40 to M1, M2, M3 and M4; and T20 to T1 and T2. Based on the clusters of these households by deciles, income share of the B40 group which contributed 17.7 per cent of total household income comes from B1 who held 2.5 per cent of total income, B2 (3.9%), B3 (5.1%) and B4 (6.2%). Similarly, in the M40, which was 39.3 per cent of the total distribution, M1 only accounted for 7.4 per cent, while M4 owned 12.6 per cent of total income. However, the details on household classification and income distribution should also take into consideration the household size in each group (**Table 3**).

**Table 3: Income Share, Median, Mean Household Income and Income Threshold by Household Decile Group, Johor, 2022**

Decile Group		Income Share (%)	Median Household Income (RM)	Mean Household Income (RM)	Income Threshold (RM)
T20	T2	27.2	19,685	23,206	15,400 and above
	T1	15.8	13,383	13,462	11,920 - 15,399
M40	M4	12.6	10,680	10,741	9,730 - 11,919
	M3	10.5	8,918	8,940	8,230 - 9,729
	M2	8.8	7,487	7,521	6,880 - 8,229
	M1	7.4	6,308	6,307	5,730 - 6,879
B40	B4	6.2	5,243	5,246	4,770 - 5,729
	B3	5.1	4,337	4,333	3,840 - 4,769
	B2	3.9	3,327	3,333	2,800 - 3,839
	B1	2.5	2,183	2,098	Less than 2,800

### 3.2.3 Household Disposable Income

Disposable income refers to the amount of income after deducting current transfer payment including compulsory payments incurred on households such as taxes, zakat and contributions to social security schemes. Disposable income is also one of the preferred measures for income distribution analysis as it is the income available to the household to support its consumption expenditure and saving during the reference period.

The findings from the 2022 survey showed that median disposable income recorded a growth rate of 2.2 per cent to RM5,899 as compared to RM5,516 in 2019 (**Chart 4**). In addition, mean disposable income was RM7,251 increase of 1.5 per cent from RM6,923 in 2019. Mean disposable income comprised of 85.1 per cent of total mean gross income (**Chart 5**).

**Chart 4: Median of Household Disposable Income by Administrative District, Johor, 2019 and 2022**

CAGR (%)	2019 (RM)		2022 (RM)	CAGR (%)
4.3	6,202	Johor Bahru	6,828	1.9
7.3	6,069	Kulai	6,364	2.2

Ranked according to highest mean value 2022

### 3.3 INCOME INEQUALITY

The economic prosperity of a country that benefited the population in a country is one of the key elements towards the existence of a developed and prosperous country. A fair economic distribution is customarily associated with inequality factor. Inequality exists when there is a difference in the ability of households to seize income opportunities. Stiglitz (2016)<sup>1</sup> argues that inequality tends to slower the economic growth. According to Stiglitz, inequality weakens the aggregate demand of individuals in the lower groups where these individuals concentrated all of their incomes to fulfil their basic necessities.

Nonetheless, basic facilities and public services provided by the government that were used collectively by the people such as education, healthcare and safely facilities able to narrow the household income gap. However, these services and facilities are excluded as part of household income value.

Income inequality can be measured using various methods. One of the popular methods is the use of Gini coefficient. Gini coefficient is defined as a measurement of income disparities using the Lorenz curve where the value of Gini coefficient is between 0 and 1. The smaller the value, the fairer the income distribution.

<sup>1</sup> Stiglitz, J.E. (2016). *Inequality and economic growth*

The 2022 findings depicted the value of Gini coefficient that was calculated based on gross income remain the same at 0.366 for 2019 and 2022. Over the period, Gini coefficient for urban and rural areas decrease from 0.365 and 0.356 to 0.364 and 0.339, respectively. The Gini coefficient can also be measured based on disposable income. Through this method, Gini coefficient decreased by 0.1 percentage points from 0.365 (2019) to 0.364 (2022). In terms of value, the Gini coefficient calculated based on disposable income presents smaller figure compared with based on gross income. This indicates that the tax system and tax payments by those who are qualified may contribute in narrowing household income gap.

### **3.4 Poverty**

Generally, similar to the Gini coefficient, poverty can also be measured using various approaches including measurement approach on absolute poverty, relative poverty and Multidimensional Poverty Index (MPI). Among the method frequently used by most of the countries is absolute poverty measurement.

#### **3.4.1 Absolute Poverty**

In Malaysia, absolute poverty measurement has been implemented since 1977 using Cost of Basic Needs approach. Through this approach, a minimum requirement level known as Poverty Line Income (PLI) is established. The component of PLI comprises of two categories which are the food PLI and the non-food PLI. The value of food PLI is obtained by estimating calorie requirements for a household.

The value of non-food PLI is determined based on the patterns of expenditure and basic necessities of low-income households obtained from Household Expenditure Survey (HES). The PLI value is the summation of food PLI and non-food PLI. A household is considered as absolute poor if its total household income is below the PLI value while a household is considered as hardcore poor if its total household income is below the food PLI.

In 2022, the mean PLI value in Johor was RM2, 627 per month while the mean food PLI value was RM1, 161 monthly with an average household size of 3.7 persons. This mean PLI value is obtained by dividing overall PLI value in each household with total number of households. The incidence of overall absolute poverty increases from 3.9 per cent in 2019 to 4.6 per cent. Similarly, the incidence of absolute poverty in urban and rural also recorded an increase to 4.2 per cent and 6.1 per cent, respectively. Meanwhile, hardcore poverty registered to 0.1 per cent in 2022 as compared to 0.2 per cent in 2019.

### **3.4.2 Relative Poverty**

*Relative poverty refers to the measurement approach of which the household income is compared with a certain standard of living determined by the society. In contrast to absolute poverty, the relative poverty threshold is not measured using the PLI, whereas it is defined as half of the median income of all households in that particular year.*

*A household is categorised as relatively poor if its total household income is below the threshold of relative poverty. The threshold of relative poverty depends on current distribution of household income in the reference year. According to this survey, the rate of relative poverty in 2022 was 15.9 per cent as compared to 15.3 per cent in 2019.*

TECHNICAL NOTES

LAPORAN SURVEI

**PENDAPATAN  
ISI RUMAH 2022**

*HOUSEHOLD INCOME SURVEY REPORT*

**Muka surat ini sengaja dibiarkan kosong**  
*This page is deliberately left blank*

## 1. PENGENALAN

Statistik yang diterbitkan dalam laporan ini adalah berdasarkan Survei Pendapatan Isi Rumah dan Kemudahan Asas (HIS & BA) 2022 yang dijalankan oleh Jabatan Perangkaan Malaysia (DOSM). Survei yang dilaksanakan dua kali dalam tempoh lima tahun ini menyediakan data pendapatan dan kemiskinan bagi **isi rumah warganegara** sahaja. Nota teknikal ini merangkumi penerangan yang lebih terperinci bagi membantu pengguna untuk memahami dengan lebih mendalam berkaitan survei dan laporan ini.

## 2. OBJEKTIF SURVEI

2.1 Objektif utama survei adalah seperti yang berikut:

- a) mengumpul maklumat pola taburan pendapatan isi rumah;
- b) mendapatkan statistik terkini berkaitan dengan isi rumah miskin; dan
- c) mengenal pasti capaian kemudahan asas yang dinikmati oleh isi rumah.

2.2 Data daripada survei ini digunakan terutamanya oleh agensi kerajaan sebagai input dalam perancangan, pembentukan pelan pembangunan negara dan pemantauan Rancangan Malaysia Kedua Belas (RMKe-12). Statistik ini juga menjadi rujukan penting kepada ahli ekonomi, ahli akademik, pihak swasta dan individu bagi keperluan penyelidikan dan analisis yang lebih terperinci.

## 3. KAEDAH PENGUMPULAN DATA

3.1 Pengumpulan data dijalankan dengan menggunakan kaedah temu ramah bersemuka. Pegawai dan anggota DOSM yang terlibat dalam survei ini diberikan latihan khusus sebagai penemuramah. Mereka akan melawat Isi Rumah (IR) di Tempat Kediaman (TK) terpilih bagi mengumpul maklumat berkaitan demografi dan pendapatan dengan menggunakan borang soal selidik.

3.2 Semakan kualiti data dibuat oleh pegawai berpengalaman dari DOSM Negeri bagi mengesan dan membetulkan sebarang kesilapan atau maklumat yang tertinggal ketika survei dilaksanakan. Proses semakan semula di lapangan juga dilaksanakan bagi isi rumah terpilih untuk memastikan data yang dipungut adalah berkualiti.

#### 4. TEMPOH RUJUKAN

Maklumat pendapatan isi rumah yang dikumpul adalah bagi tempoh dua belas bulan yang lalu. Sebagai contoh, bagi survei bulan Disember 2022, maka pendapatan isi rumah yang dikira adalah dari 1 Disember 2021 sehingga 30 November 2022.

#### 5. SKOP DAN LIPUTAN

5.1 Survei ini meliputi negeri, strata (bandar dan luar bandar) dan daerah pentadbiran di Malaysia.

5.2 Liputan survei ini adalah isi rumah yang tinggal di **TK persendirian** sahaja dan tidak termasuk mereka yang tinggal di tempat kediaman institusi seperti asrama, hotel, hospital, rumah orang tua, penjara dan rumah kebajikan.

#### 6. KONSEP DAN DEFINISI

##### 6.1 Tempat Kediaman

Tempat Kediaman adalah suatu struktur yang dibina berasingan dan bebas yang lazimnya digunakan untuk tempat tinggal. Takrifan perkataan **berasingan** dan **bebas** adalah seperti berikut:

a) **Berasingan**

Struktur dianggap sebagai berasingan jika ia dikelilingi sama ada dinding, pagar atau sebagainya serta ditutupi oleh bumbung.

b) **Bebas**

Struktur dikatakan bebas apabila ia mempunyai jalan masuk terus dari laluan umum, tempat lalu lintas atau ruang lapang (iaitu penghuni boleh masuk atau keluar dari tempat kediaman mereka tanpa melalui pekarangan orang lain).

##### 6.2 Isi Rumah

Isi rumah ditakrifkan sebagai seorang atau sekumpulan orang yang bersaudara atau orang yang tidak bersaudara yang biasanya tinggal bersama dan membuat peruntukan yang sama untuk makanan dan keperluan hidup yang lain.

### **6.3 Ketua Isi Rumah**

Ketua isi rumah ditakrifkan sebagai seorang ahli biasa sama ada lelaki atau perempuan yang dianggap sebagai ketua oleh ahli isi rumah yang lain. Ketua isi rumah mesti seorang penerima pendapatan yang berumur 15 tahun dan ke atas.

### **6.4 Pendapatan**

Maklumat pendapatan yang terperinci diperolehi daripada ahli isi rumah yang menerima pendapatan. Konsep dan definisi pendapatan yang digunakan dalam survei ini adalah merujuk kepada **Canberra Group Handbook on Household Income Statistics, Second Edition, 2011** yang diterbitkan oleh United Nations. Punca pendapatan adalah merangkumi:

#### **a) Pekerjaan Bergaji**

Pendapatan daripada pekerjaan bergaji boleh diterima dalam bentuk wang tunai atau dalam bentuk barangan dan perkhidmatan. Ini termasuk upah dan gaji untuk masa bekerja dan kerja yang dilakukan; bonus tunai dan ganjaran; komisen dan tips; elaun; bonus perkongsian keuntungan dan lain-lain bentuk pembayaran keuntungan yang berkaitan dan barangan & perkhidmatan percuma atau subsidi daripada majikan (termasuk makanan percuma/konsesi).

Dari segi konsep, pendapatan pekerja juga termasuk insurans sosial sumbangan daripada majikan, pencaruman majikan kepada Kumpulan Wang Simpanan Pekerja (KWSP) dan bayaran pampasan pemberhentian & penamatan (kecuali bayaran persaraan *one-off* seperti gratuiti bagi pesara, yang dianggap sebagai pindahan modal).

**b) Bekerja Sendiri**

Pendapatan yang diterima oleh individu hasil daripada bekerja sendiri. Pendapatan bersih daripada bekerja sendiri termasuk keuntungan atau kerugian yang terakru kepada pemilik atau rakan kongsi atau mereka yang bekerja dalam perusahaan yang tidak diperbadankan. Ia juga termasuk anggaran nilai barangan dan perkhidmatan yang diperoleh melalui pertukaran barang serta barangan atau tanaman/ ternakan yang dihasilkan untuk kegunaan sendiri, setelah ditolak perbelanjaan.

Asas untuk mengukur pendapatan daripada bekerja sendiri dalam statistik pendapatan isi rumah adalah berdasarkan konsep pendapatan bersih iaitu nilai output kasar ditolak kos operasi dan selepas pelarasan bagi susut nilai aset yang digunakan dalam pengeluaran. Keuntungan berlaku apabila pendapatan adalah lebih besar daripada perbelanjaan operasi, manakala kerugian berlaku apabila perbelanjaan operasi adalah lebih besar daripada penerimaan.

**c) Harta & Pelaburan**

Pendapatan daripada harta & pelaburan adalah terimaan daripada pemilikan aset, faedah, dividen dan sewa. Perincian adalah seperti berikut:

- Pendapatan daripada harta benda ditakrifkan sebagai pulangan daripada penggunaan atau pelaburan aset yang disediakan kepada orang lain untuk kegunaan mereka. Ia merangkumi pulangan yang biasanya dalam bentuk kewangan, daripada aset kewangan (faedah dan dividen), aset bukan kewangan (sewa) dan royalti;
- Penerimaan faedah ialah bayaran yang diterima daripada akaun bank atau institusi kewangan yang lain, perakuan deposit, bon kerajaan/ pinjaman, sekuriti, debentur dan pinjaman kepada ahli-ahli bukan isi rumah;
- Dividen adalah penerimaan daripada pelaburan dalam sebuah syarikat di mana pelabur tidak terlibat dengan aktiviti syarikat. Ini termasuk *silent partner*. Ia juga termasuk pencen dan anuiti dalam bentuk dividen daripada skim insurans swasta;

- Sewa ialah bayaran yang diterima untuk penggunaan aset seperti tanah dan rumah;
- Royalti adalah pendapatan yang diperoleh daripada perkhidmatan bahan dipatenkan atau hak cipta, contohnya seperti hak penulisan, hak cipta bagi gubahan lagu dan lain-lain; dan
- Sewa dinilai bagi rumah sendiri yang diduduki oleh pemiliknya.

**d) Pindahan Semasa Diterima**

Pindahan boleh terdiri daripada wang tunai, barangan atau perkhidmatan. Pindahan boleh dibuat antara isi rumah ke isi rumah yang lain, antara kerajaan dan isi rumah, atau antara isi rumah dan badan-badan amal. Penerimaan boleh daripada dalam atau luar negara. Pindahan Semasa ini adalah bermotivasikan pengagihan semula pendapatan sama ada oleh kerajaan (contoh: bantuan pendidikan, zakat dan Bantuan Prihatin Rakyat (BPR)/ Bantuan Sara Hidup (BSH)/ Bantuan Keluarga Malaysia (BKM)) atau persendirian/ swasta (contoh: program bantuan sosial korporat).

Pindahan Semasa yang diterima secara langsung memberi kesan kepada tahap Pendapatan Kasar dan mempengaruhi penggunaan barangan dan perkhidmatan. Justeru, semua Pindahan Semasa yang diterima dalam bentuk wang tunai dan barangan atau perkhidmatan adalah dianggap sebagai sebahagian daripada pendapatan. Walau bagaimanapun, Pindahan Semasa tersebut tidak meliputi pindahan modal.

**6.5 Pendapatan Kasar dan Pendapatan Boleh Guna**

Pendapatan kasar dan pendapatan boleh guna merupakan dua konsep utama pendapatan yang diguna pakai di dalam laporan ini dan boleh ditakrifkan seperti berikut:

**a) Pendapatan Kasar**

Pendapatan kasar adalah jumlah pendapatan yang diperoleh oleh isi rumah daripada semua punca pendapatan seperti yang dinyatakan di perkara 6.4.

**b) Pendapatan Boleh Guna**

Pendapatan boleh guna adalah pendapatan kasar isi rumah setelah ditolak pindahan semasa yang dibayar seperti cukai langsung, sumbangan kepada isi rumah lain, bayaran zakat dan pindahan semasa lain yang dibayar serta pindahan semasa yang diterima secara mata benda (*in-kind*). Konsep pendapatan boleh guna ini mencerminkan pendapatan sebenar isi rumah terhadap penggunaan semasa dan simpanan.

Bagi tujuan survei ini, kesan taburan perbelanjaan awam (*collective expenditure*) tidak diambil kira kerana kesukaran untuk menilai faedah yang diperoleh sebagai sebahagian daripada pendapatan isi rumah.

**6.6 Pendapatan Isi Rumah**

Pendapatan isi rumah ialah jumlah pendapatan yang biasanya diterima (terakru) oleh ahli isi rumah, dalam bentuk wang tunai atau barangan yang diterima berulang kali dalam tempoh rujukan survei (jangka masa setahun atau lebih kerap).

**6.7 Penerima Pendapatan**

Penerima pendapatan merujuk kepada ahli isi rumah yang menerima pendapatan daripada mana-mana punca (seperti perkara 6.4) dalam tempoh rujukan. Satu isi rumah boleh mempunyai lebih daripada seorang penerima pendapatan.

**6.8 Kumpulan Etnik**

Kumpulan etnik warganegara Malaysia dikategorikan seperti berikut:

- a) Bumiputera;
- b) Cina;
- c) India; dan
- d) Lain-lain.

**6.9 Sijil tertinggi diperoleh**

Merujuk kepada sijil tertinggi diperoleh daripada institusi pendidikan awam atau swasta yang menyediakan pendidikan rasmi. Sijil tertinggi diperoleh dikelaskan mengikut *International Standard Classification of Education (ISCED)*:

**a) PMR atau yang Setaraf**

Merujuk kepada Penilaian Menengah Rendah, Sijil Rendah Pelajaran, *Lower Certificate of Education*, Sijil Rendah Agama, Pentaksiran Tingkatan Tiga atau yang setaraf.

**b) SPM atau yang Setaraf**

Merujuk kepada Sijil Pelajaran Malaysia atau yang setaraf (*Senior Cambridge Certificate, GCE O Level* dan Sijil Pelajaran Vokasional Malaysia). Termasuk sijil kemahiran asas yang diperoleh daripada institusi latihan kemahiran khusus dan teknikal yang mana tempoh pengajian adalah sekurang-kurangnya enam bulan seperti sijil GIATMARA.

**c) STPM atau yang Setaraf**

Merujuk kepada Sijil Tinggi Persekolahan Malaysia, *Higher School Certificate*, atau kelulusan yang setaraf (Sijil Tinggi Agama dan *GCE A Level*).

**d) Sijil**

Merujuk kepada sijil diperoleh daripada kolej, politeknik atau institusi-institusi lain yang menawarkan pendidikan rasmi. Tempoh pensijilan adalah tidak kurang dari enam bulan.

**e) Diploma**

Merujuk kepada diploma dan sijil setaraf dengannya yang diperoleh daripada universiti, kolej, maktab atau politeknik sebelum peringkat ijazah.

**f) Ijazah**

Merujuk kepada ijazah (Ijazah Sarjana Muda, Sarjana atau Doktor Falsafah) yang diperoleh daripada institusi pengajian tinggi awam atau swasta atau yang setaraf.

**g) Tiada Sijil**

Merujuk kepada mereka yang masih bersekolah atau telah tamat persekolahan tanpa memperoleh sebarang sijil.

### **6.10 Pekerjaan**

Pekerjaan dikelaskan mengikut klasifikasi Piawaian Pengelasan Pekerjaan Malaysia (MASCO) 2020 yang dibangunkan oleh Kementerian Sumber Manusia (KSM) berasaskan Piawaian Pengelasan Pekerjaan Antarabangsa (ISCO: *International Standard Classification of Occupations*).

Bagi seseorang yang mempunyai lebih daripada satu pekerjaan, hanya pekerjaan yang mengambil masa yang terbanyak semasa tempoh rujukan dianggap sebagai pekerjaan utamanya. Jika masa bekerja setiap pekerjaan itu sama, maka pekerjaan yang menghasilkan pendapatan yang tertinggi adalah pekerjaan utamanya. Dalam kes di mana tempoh bekerja dan pendapatannya adalah sama bagi setiap pekerjaan, pekerjaan di mana dia telah bekerja paling lama dianggap sebagai pekerjaan utamanya.

### **6.11 Industri**

Industri bagi pekerjaan utama seseorang dikelaskan mengikut Piawaian Klasifikasi Industri Malaysia (MSIC) 2008 yang berasaskan kepada *International Standard Industrial Classification of All Economic Activities (ISIC) Revision 4*.

## **7. RANGKA PENSAMPELAN**

**7.1** Rangka yang digunakan bagi pemilihan sampel HIS & BA 2022 adalah berdasarkan Rangka Pensampelan Isi Rumah yang terdiri daripada Blok Penghitungan (BP) yang diwujudkan untuk Banci Penduduk dan Perumahan 2020 yang dikemaskini dari semasa ke semasa. BP merupakan suatu kawasan muka bumi yang diwujudkan untuk tujuan pelaksanaan operasi survei yang secara puratanya mengandungi antara 80 hingga 120 TK. Semua BP dibentuk di dalam lingkungan sempadan yang diwartakan iaitu di dalam daerah pentadbiran, mukim atau kawasan pihak berkuasa tempatan.

- 7.2** BP dalam rangka pensampelan dikelaskan mengikut kawasan bandar dan luar bandar. Kawasan bandar ditakrif sebagaimana yang telah digunakan dalam Banci Penduduk dan Perumahan 2020. Kawasan bandar ialah kawasan yang diwartakan serta kawasan tepu bina yang bersempadan dengannya dan gabungan kedua-dua kawasan ini mempunyai penduduk seramai 10,000 orang atau lebih semasa Banci Penduduk dan Perumahan 2020. Kawasan selainnya, yang diwartakan dan mempunyai jumlah penduduk kurang daripada 10,000 orang serta kawasan yang tidak diwartakan, dikelaskan sebagai kawasan luar bandar.
- 7.3** Kawasan tepu bina adalah kawasan yang terletak bersebelahan kawasan yang diwartakan dan mempunyai sekurang-kurangnya 60 peratus penduduk (berumur 15 tahun dan lebih) yang terlibat dalam aktiviti bukan pertanian.
- 7.4** Definisi kawasan bandar juga mengambil kira kawasan pembangunan khusus iaitu kawasan pembangunan yang tidak diwartakan dan boleh dikenal pasti serta terpisah dari kawasan yang diwartakan atau kawasan tepu bina melebihi lima kilometer dan mempunyai penduduk sekurang-kurangnya 10,000 orang dengan 60 peratus penduduk (berumur 15 tahun dan lebih) yang terlibat dalam aktiviti bukan pertanian.
- 7.5** Pembandaran merupakan proses yang dinamik dan sentiasa berubah mengikut kemajuan dan pembangunan. Oleh itu, kawasan bandar bagi Banci Penduduk dan Perumahan 2010 dan 2020 tidak semestinya merujuk kepada kawasan yang sama kerana kawasan yang memenuhi kriteria bandar akan terus bertambah dan berkembang mengikut masa.
- 7.6** Klasifikasi kawasan mengikut strata yang digunakan adalah seperti berikut:

<b>Strata</b>	<b>Jumlah penduduk dalam kawasan yang diwartakan, tepu bina dan kawasan pembangunan khusus</b>
Metropolitan	75,000 dan lebih
Bandar besar	10,000 hingga 74,999
Bandar kecil	1,000 hingga 9,999
Luar bandar	Kawasan selebihnya

**7.7** Bagi tujuan pensampelan, klasifikasi kawasan seperti di perkara 7.6 adalah digunakan untuk semua negeri serta Wilayah Persekutuan. Bagi Sabah dan Sarawak, memandangkan masalah kesukaran untuk akses ke kawasan pedalaman, strata luar bandar dikembangkan lagi berdasarkan kepada jangka waktu yang diambil untuk sampai ke sesuatu tempat dari pusat bandar yang terdekat.

**7.8** Bagi tujuan penjadualan laporan, strata-strata dicantumkan seperti berikut:

Bandar = Metropolitan + Bandar besar

Luar bandar = Bandar kecil + Keseluruhan luar bandar

## **8. REKA BENTUK PENSAMPELAN**

**8.1** Reka bentuk pensampelan berstrata dua peringkat telah digunakan dalam HIS & BA 2022. Pembentukan strata adalah seperti berikut:

Strata utama	Meliputi semua negeri di Malaysia
Strata kedua	Meliputi daerah pentadbiran bagi semua negeri di Malaysia
Strata ketiga	Meliputi strata bandar dan luar bandar seperti yang dinyatakan di perkara 7.8

**8.2** Pemilihan sampel dilakukan pada peringkat BP dengan menggunakan kaedah pensampelan rawak sistematik. Seterusnya sampel TK dipilih dari BP yang terpilih juga menggunakan kaedah sama melalui penjanaan nombor rawak dan menetapkan selang pemilihan supaya setiap TK mempunyai kebarangkalian yang sama untuk terpilih. Prosedur ini dilaksanakan secara teratur dan saintifik untuk menghasilkan sampel yang tidak pincang (*unbiased*) dan boleh mewakili keseluruhan populasi isi rumah di Malaysia.

## 9. SAIZ SAMPEL

9.1 Saiz sampel HIS & BA 2022 perlu mewakili populasi mengikut keperluan peringkat analisis yang ditetapkan. Saiz sampel ini telah mengambil kira elemen berikut:

- i) Penemuan daripada survei yang lepas iaitu HIS & BA 2019
- ii) Reka bentuk pensampelan; dan
- iii) Ralat yang disasarkan.

9.2 Penganggaran saiz sampel dikira di setiap daerah pentadbiran dan substrata (bandar dan luar bandar). Pengiraan saiz sampel turut mengambil kira purata pendapatan, asas keyakinan pada 95 peratus, ralat piawai relatif, kesan reka bentuk dan kadar respon yang telah ditetapkan.

9.3 Pengiraan saiz sampel bagi sub populasi  $j$ ,  $n_{1j}$  dikira menggunakan formula berikut:

$$n_{1j} = \frac{n_{0j}}{1 + \frac{n_{0j}}{N_j}} \quad ; j = 1, 2, 3, \dots, k$$

di mana:

$$n_{0j} = \frac{\sigma^2}{(RSE \times \mu)^2}$$

Bagi memenuhi andaian-andaian dalam Pensampelan Berstrata, maka faktor kesan reka bentuk (D.E.) diambil kira:

$$D.E. = \frac{\text{varians bagi reka bentuk kompleks}}{\text{varians bagi SRS}}$$

Saiz sampel dengan mengambilkira D.E. bagi sub populasi  $j$ ,  $n_{2j}$  diberikan oleh:

$$n_{2j} = n_{1j} \times D.E.$$

Dan seterusnya, mengambil kira kadar respon survei lepas, maka saiz sampel keseluruhan bagi sub populasi  $j$ ,  $n_{3j}$  adalah seperti berikut:

$$n_{3j} = n_{2j} \times \frac{1}{\text{Kadar Respon}}$$

Maka, jumlah saiz sampel,  $n$  diberi oleh:

$$n = \sum_{j=1}^k n_{3j}$$

di mana:

- $n_{0j}$  saiz sampel asas yang diperoleh mengambil kira ukuran populasi diketahui (FPC) bagi sub populasi  $j$
- $n_{1j}$  saiz sampel yang mengambil kira faktor populasi bagi sub populasi  $j$
- $n_{2j}$  saiz sampel yang mengambil kira faktor kesan rekabentuk bagi sub populasi  $j$
- $n_{3j}$  saiz sampel yang mengambil kira faktor kadar respon bagi sub populasi  $j$
- $N$  jumlah unit elemen dalam populasi
- $n$  saiz sampel keseluruhan
- $\sigma$  sisihan piawai
- $RSE$  ralat piawai relatif
- $\mu$  purata pendapatan daripada survei yang lepas

#### 9.4 Saiz sampel bagi HIS & BA 2022 adalah seperti berikut:

**Jadual 2: Bilangan BP, TK dan Isi Rumah Respons mengikut Negeri, Malaysia, 2022**

Negeri	Bilangan BP	Bilangan TK	Bilangan isi rumah respons
<b>Malaysia</b>	<b>11,609</b>	<b>92,872</b>	<b>89,253</b>
Johor	955	7,640	7,517
Kedah	789	6,312	6,138
Kelantan	700	5,600	5,177
Melaka	332	2,656	2,504
Negeri Sembilan	409	3,272	3,111
Pahang	601	4,808	4,662
Pulau Pinang	634	5,072	4,693
Perak	919	7,352	7,214
Perlis	205	1,640	1,600
Selangor	1,333	10,664	10,470
Terengganu	564	4,512	4,299
Sabah	1,464	11,712	11,507
Sarawak	1,785	14,280	13,516
W.P. Kuala Lumpur	729	5,832	5,387
W.P. Labuan	91	728	716
W.P. Putrajaya	99	792	742

## 10. PENGANGGARAN

Dalam prosedur penganggaran, pemberat (*non-response weight*) digunakan untuk mengambil kira kes tidak respon. Pemberat asal (*design weight*) disesuaikan dengan mengambil kira kadar tidak respon bagi setiap domain atau strata. Sebagai contoh, sekiranya 5,000 isi rumah terpilih tetapi sebanyak 4,000 isi rumah sahaja yang respon kepada survei maka pemberat asal (*design weight*) akan disesuaikan dengan mengambil kira 20 peratus tidak respon. Sekiranya pemberat asal (*design weight*) adalah 2.0 yang memberi maksud satu sampel isi rumah mewakili dua isi rumah dalam populasi maka pemberat (*non-response weight*) akan menjadi 2.5 yang memberi maksud satu sampel isi rumah mewakili 2.5 isi rumah yang lain.

## 11. LIMITASI DATA

**11.1** Salah satu limitasi adalah data pendapatan isi rumah hanya meliputi bahagian pendapatan yang terakru dan diterima secara berulang kali dalam bentuk tunai atau barangan semasa tempoh rujukan survei.

**11.2** Data pendapatan yang disediakan dalam laporan ini telah diperoleh melalui survei bagi isi rumah yang tinggal di tempat kediaman persendirian sahaja dan tidak termasuk tempat kediaman institusi. Tambahan pula, pendapatan isi rumah serta ciri-ciri yang digunakan untuk analisis (contohnya seperti: kumpulan etnik, kumpulan umur, kumpulan industri, kumpulan pekerjaan dan sijil tertinggi diperoleh) adalah merujuk kepada ketua isi rumah. Justeru, had tertentu berkaitan penggunaan data pendapatan mungkin akan timbul.

**11.3** Analisis laporan ini merujuk kepada ketua isi rumah yang tidak semestinya merupakan penerima pendapatan utama.

## 12. PENILAIAN DATA

12.1 Data yang diperoleh daripada survei yang dijalankan secara sampel berkebarangkalian ini tertakluk kepada dua jenis iaitu ralat pensampelan dan ralat bukan pensampelan.

### i) Ralat Pensampelan

Ralat pensampelan berpunca daripada anggaran data yang terhasil daripada sampel berkebarangkalian dan boleh diukur dengan mengira Ralat Piawai Relatif, biasanya dinyatakan dalam bentuk peratusan. Ralat ini digunakan sebagai penunjuk kepada kepersisan anggaran parameter yang dikaji, memberikan gambaran tahap variasi antara pemboleh ubah yang dianggarkan melalui survei dan parameter populasi.

Sebagai contoh, penemuan HIS & BA 2022 mendapati pendapatan kasar isi rumah bulanan purata bagi Johor adalah RM8,517 dengan Ralat Piawai Relatif 1.1 peratus. Dalam erti kata lain, nilai Ralat Piawai adalah RM98. Berasaskan 95 peratus selang keyakinan ( $\alpha=0.05$ ), pendapatan kasar isi rumah bulanan purata berada dalam julat antara RM8,326 hingga RM8,708 sebulan.

### ii) Ralat Bukan Pensampelan

Ralat ini boleh berpunca daripada liputan survei yang tidak lengkap, kelemahan liputan rangka, ralat dalam maklum balas, tiada respons dan kesilapan semasa peringkat pemprosesan seperti penyuntingan, pengekodan dan tangkapan data. Untuk memastikan kualiti data berada pada tahap yang tinggi, pelbagai langkah pentadbiran telah dilaksanakan untuk meminimumkan ralat bukan pensampelan. Langkah-langkah ini termasuk latihan intensif yang diberikan kepada penyelia dan penemuramah serta penyeliaan yang rapi dan semakan rawak dijalankan ke atas isi rumah yang diliputi oleh penemuramah untuk memastikan kesahihan maklumat yang direkodkan.

Bagi mengatasi kes tiada respons yang berpunca daripada beberapa sebab seperti TK kosong, tiada penghuni di rumah, enggan bekerjasama atau TK tidak layak diliputi dalam survei, maka penganggaran saiz sampel HIS & BA 2022 telah mengambil kira semua kemungkinan tersebut.

Pengemaskinian rangka pensampelan yang dilaksanakan dari semasa ke semasa telah dapat mengurangkan kadar tiada respons yang berpunca daripada TK kosong. Publisiti yang meluas dilaksanakan melalui media elektronik serta media cetak bagi mengurangkan kes tiada penghuni di rumah dan enggan bekerjasama.

Selain daripada itu, di peringkat prosesan data, semakan konsistensi bagi setiap pembolehubah dan proses validasi telah dilaksanakan secara sistematik bagi meminimumkan semua ralat bukan pensampelan.

### **13. LIMITASI ANALISIS**

Penemuan HIS & BA 2022 mendapati kepersisan anggaran pendapatan kasar isi rumah bulanan purata mengikut daerah pentadbiran berada di tahap kebolehpercayaan yang tinggi. Sebagai contoh, pendapatan kasar isi rumah bulanan purata di daerah Batu Pahat adalah RM7,419 dengan Ralat Piawai Relatif 2.4 peratus. Dalam erti kata lain, nilai Ralat Piawai adalah RM176. Berasaskan 95 peratus selang keyakinan ( $\alpha=0.05$ ), pendapatan kasar isi rumah bulanan purata bagi daerah Batu Pahat berada dalam julat antara RM7,074 hingga RM7,764 sebulan. Analisis terperinci data pendapatan bagi peringkat daerah pentadbiran adalah berdasarkan kebolehpercayaan nilai relatif sehingga tidak melebihi selang toleransi 20 peratus.

### **14. HAD PENDAPATAN BAGI KUMPULAN ISI RUMAH MENGIKUT PENDAPATAN**

#### **14.1 Kumpulan Isi Rumah mengikut Pendapatan**

Had pendapatan isi rumah bulanan mengikut kumpulan isi rumah bagi Tertinggi 20 peratus (T20), Pertengahan 40 peratus (M40) dan Terendah 40 peratus (B40) bagi setiap strata, kumpulan etnik dan negeri adalah seperti berikut:

**Jadual 3: Had Pendapatan Kasar Isi Rumah Bulanan mengikut Kumpulan Isi Rumah dan Strata, Malaysia, 2022**

Strata	Had Pendapatan (RM)		
	Terendah 40%	Pertengahan 40%	Tertinggi 20%
<b>Malaysia</b>	<b>&lt; 5,250</b>	<b>5,250 - 11,819</b>	<b>≥ 11,820</b>
Bandar	< 6,030	6,030 - 12,899	≥ 12,900
Luar bandar	< 3,510	3,510 - 7,039	≥ 7,040

**Jadual 4: Had Pendapatan Kasar Isi Rumah Bulanan mengikut Kumpulan Isi Rumah dan Kumpulan Etnik, Malaysia, 2022**

Kumpulan Etnik	Had Pendapatan (RM)		
	Terendah 40%	Pertengahan 40%	Tertinggi 20%
Bumiputera	< 4,860	4,860 - 10,679	≥ 10,680
Cina	< 6,650	6,650 - 14,689	≥ 14,690
India	< 5,580	5,580 - 11,989	≥ 11,990
Lain-lain	< 3,889	3,890 - 7,699	≥ 7,700

**Jadual 5: Had Pendapatan Kasar Isi Rumah Bulanan mengikut Kumpulan Isi Rumah dan Negeri, Malaysia, 2022**

Negeri	Had Pendapatan (RM)		
	Terendah 40%	Pertengahan 40%	Tertinggi 20%
<b>Malaysia</b>	<b>&lt; 5,250</b>	<b>5,250 - 11,819</b>	<b>≥ 11,820</b>
Johor	< 5,740	5,740 - 11,919	≥ 11,920
Kedah	< 3,750	3,750 - 7,429	≥ 7,430
Kelantan	< 3,060	3,060 - 6,469	≥ 6,470
Melaka	< 5,220	5,220 - 11,169	≥ 11,170
Negeri Sembilan	< 4,329	4,330 - 9,509	≥ 9,510
Pahang	< 4,140	4,140 - 7,799	≥ 7,800
Pulau Pinang	< 5,580	5,580 - 11,489	≥ 11,490
Perak	< 3,790	3,790 - 7,919	≥ 7,920
Perlis	< 4,090	4,090 - 7,789	≥ 7,790
Selangor	< 8,390	8,390 - 15,729	≥ 15,730
Terengganu	< 5,150	5,150 - 9,229	≥ 9,230
Sabah	< 3,840	3,840 - 8,529	≥ 8,530
Sarawak	< 4,160	4,160 - 9,209	≥ 9,210
W.P. Kuala Lumpur	< 8,880	8,880 - 16,779	≥ 16,780
W.P. Labuan	< 6,020	6,020 - 10,799	≥ 10,800
W.P. Putrajaya	< 8,970	8,970 - 18,319	≥ 18,320

**Jadual 6: Had Pendapatan Boleh Guna Isi Rumah Bulanan mengikut Kumpulan Isi Rumah dan Strata, Malaysia, 2022**

Strata	Had Pendapatan (RM)		
	Terendah 40%	Pertengahan 40%	Tertinggi 20%
<b>Malaysia</b>	<b>&lt; 4,500</b>	<b>4,500 - 9,919</b>	<b>≥ 9,920</b>
Bandar	< 5,110	5,110 - 10,709	≥ 10,710
Luar bandar	< 3,100	3,100 - 6,209	≥ 6,210

**Jadual 7: Had Pendapatan Boleh Guna Isi Rumah Bulanan mengikut Kumpulan Isi Rumah dan Kumpulan Etnik, Malaysia, 2022**

Kumpulan Etnik	Had Pendapatan (RM)		
	Terendah 40%	Pertengahan 40%	Tertinggi 20%
Bumiputera	< 4,180	4,180 - 9,089	≥ 9,090
Cina	< 5,640	5,640 - 12,019	≥ 12,020
India	< 4,690	4,690 - 9,889	≥ 9,890
Lain-lain	< 3,299	3,300 - 6,649	≥ 6,650

**Jadual 8: Had Pendapatan Boleh Guna Isi Rumah Bulanan mengikut Kumpulan Isi Rumah dan Negeri, Malaysia, 2022**

Negeri	Had Pendapatan (RM)		
	Terendah 40%	Pertengahan 40%	Tertinggi 20%
<b>Malaysia</b>	<b>&lt; 4,500</b>	<b>4,500 - 9,919</b>	<b>≥ 9,920</b>
Johor	< 4,880	4,880 - 10,159	≥ 10,160
Kedah	< 3,250	3,250 - 6,479	≥ 6,480
Kelantan	< 2,670	2,670 - 5,759	≥ 5,760
Melaka	< 4,550	4,550 - 9,739	≥ 9,740
Negeri Sembilan	< 3,740	3,740 - 7,979	≥ 7,980
Pahang	< 3,720	3,720 - 6,889	≥ 6,890
Pulau Pinang	< 4,740	4,740 - 9,479	≥ 9,480
Perak	< 3,240	3,240 - 6,749	≥ 6,750
Perlis	< 3,780	3,780 - 7,229	≥ 7,230
Selangor	< 7,010	7,010 - 12,889	≥ 12,890
Terengganu	< 4,650	4,650 - 8,279	≥ 8,280
Sabah	< 3,350	3,350 - 7,389	≥ 7,390
Sarawak	< 3,580	3,580 - 7,979	≥ 7,980
W.P. Kuala Lumpur	< 7,130	7,130 - 13,349	≥ 13,350
W.P. Labuan	< 4,810	4,810 - 8,749	≥ 8,750
W.P. Putrajaya	< 7,960	7,960 - 15,049	≥ 15,050

#### 14.2 Kumpulan Pendapatan Kuintil

Nilai yang diperoleh daripada hasil pembahagian data yang disusun mengikut magnitud kepada lima bahagian yang sama dipanggil kuintil. Dengan menggunakan kaedah ini, isi rumah telah disusun mengikut pendapatan dengan susunan menaik. Kuintil membahagikan isi rumah kepada lima kumpulan sama rata (dari terendah kepada tertinggi) yang mana setiap kumpulan mewakili 20 peratus atau satu perlima daripada bilangan isi rumah.

#### 14.3 Kumpulan Pendapatan Desil

Kumpulan desil pendapatan merupakan susunan yang kesepuluh dari isi rumah yang mana susunan ini disusun dari minimum ke maksimum. Kumpulan desil pertama adalah persepuluh yang pertama (10 peratus daripada semua isi rumah dengan pendapatan terendah). Desil yang terakhir adalah persepuluh dari isi rumah dengan pendapatan tertinggi.

### 15. KADAR PERTUMBUHAN TAHUNAN DIKOMPAN

Pengiraan kadar pertumbuhan tahunan dikompaun adalah berdasarkan kepada fungsi eksponen seperti berikut:

$$CAGR = \frac{\ln\left(\frac{Y_t}{Y_0}\right)}{t} \times 100$$

di mana;

<i>CAGR</i>	kadar pertumbuhan tahunan dikompaun
$Y_t$	pendapatan isi rumah bulanan tahun semasa
$Y_0$	pendapatan isi rumah bulanan tahun sebelumnya
$t$	tempoh masa antara tahun semasa dengan tahun sebelumnya

### 16. PEMBUNDARAN ANGGARAN

Pengiraan bagi sesuatu kategori mungkin tidak sentiasa sama antara jadual disebabkan oleh pembundaran secara bebas. Walau bagaimanapun, perbezaan ini adalah tidak ketara.

Peratus yang ditunjukkan dalam jadual adalah diperoleh daripada angka sebenar dan tidak semestinya memberikan jumlah genap 100 peratus disebabkan pembundaran, walaupun jumlah yang ditunjukkan adalah 100 peratus.

## 17. NOTA DAN SIMBOL

- 0.0      Kurang daripada setengah unit terkecil yang ditunjukkan. Misalnya, kurang daripada 0.05 peratus
- Tiada/ kosong/ tiada kes
- W.P.     Wilayah Persekutuan
- RM       Ringgit Malaysia
- n.a.      Tidak berkenaan
- n.s.      Tidak signifikan

**Muka surat ini sengaja dibiarkan kosong**  
*This page is deliberately left blank*

## **1. INTRODUCTION**

*The statistics published in this report is based on the Household Income and Basic Amenities Survey (HIS & BA) 2022 conducted by the Department of Statistics Malaysia (DOSM). The survey was carried out twice in five years to provide the data regarding income and poverty for **citizens** only. This technical note contains more detailed descriptions to help users to better understand this survey and report.*

## **2. OBJECTIVE OF SURVEY**

**2.1** *The main objectives of the survey are as follows:*

- a) to collect information on income distribution pattern of households;*
- b) to gather current statistics on poor households; and*
- c) to identify the accessibility of basic amenities by households.*

**2.2** *Data from the survey are pertinent information used by government agencies as inputs in the planning, the formation of national development plans and the monitoring of The Twelfth Malaysia Plan (Twelfth Plan). Furthermore, these data also serve as an essential reference to economists, academicians, the private sectors and individuals for more detailed research and analysis.*

## **3. METHOD OF DATA COLLECTION**

**3.1** *Data collection is carried out using the face-to-face interview approach. DOSM officers and staffs who were involved in this survey were given special training as interviewers. They will visit Households (HH) in selected Living Quarters (LQ) to collect information related to demographics and income by using a set of questionnaires.*

**3.2** *Data quality checks are made by experienced officers from the DOSM State office to detect and correct any errors or missing information when the survey is carried out. The field review process is also implemented for selected households to ensure the data collected are of good quality.*

#### 4. REFERENCE PERIOD

The information on household income was collected for the past twelve months. For example, for December 2022 survey month, the household income calculated is from 1<sup>st</sup> December 2021 to 30<sup>th</sup> November 2022.

#### 5. SCOPE AND COVERAGE

- 5.1 This survey covers states, strata (urban and rural) and administrative districts in Malaysia.
- 5.2 The coverage of this survey are households that live in **private LQ** only and does not include those who live in institutional residences such as hostels, hotels, hospitals, old folk's homes, prisons and welfare homes.

#### 6. CONCEPTS AND DEFINITION

##### 6.1 Living Quarters

Living Quarters are defined as separate and independent structures that are usually used for living. The terms, **separate** and **independent** are defined as follows:

a) **Separate**

A structure is considered separate if it is surrounded by either walls, fences, etc. and is covered by a roof.

b) **Independent**

A structure is said to be independent when it has a direct access via public path, communal passageway or open space (i.e. the occupants can enter or exit their living quarters without going through someone else's premises).

##### 6.2 Household

A household is defined as a person or group of related or unrelated people who usually live together and make common provisions for food and other living essentials.

### **6.3 Head of Household**

*Head of household is defined as any member whether male or female who is considered the head of household by other members of the household. The head of the household must be an income recipient aged 15 years and above.*

### **6.4 Income**

*Detailed information on income is obtained from household members who receive income. The concept and definition of income used in this survey refers to the **Canberra Group Handbook on Household Income Statistics, Second Edition, 2011** published by the United Nations. The sources of income include:*

#### **a) Paid Employment**

*Income from paid employment can be received in the form of cash or in the form of goods and services. This includes wages and salaries for time worked and work performed; cash bonuses and gratuities; commissions and tips; allowance; profit-sharing bonuses and other forms of profit-related payments and free or subsidised goods & services from employers (including free food/ concession).*

*Conceptually, employee income also includes social insurance contributions from employers, employer contributions to Employees Provident Fund (EPF) and severance & termination compensation payments (except for one-off retirement payments such as gratuities for pensioners, which are considered capital transfers).*

#### **b) Self-Employment**

*Income earned by individuals as a result of self-employment. Net income from self-employment includes profits or losses accruing to owners or partners or those working in an unincorporated enterprise. It also includes an estimate of the value of goods and services obtained through barter as well as goods or crops/ livestock produced for own use, after deducting operating expenses.*

*The basis for measuring income from self-employment in household income statistics is based on the concept of net income, which is the value of gross output minus operating costs and after adjustment for depreciation of assets used in production. Profit occurs when income is greater than operating expenses, while a loss occurs when operating expenses are greater than earnings.*

**c) Property & Investment**

*Income from property & investment is receipts from asset ownership, interest, dividends and rent. The details are as follows:*

- *Income from property is defined as the revenue earned from the use or investment of assets made available to others for their use. It comprises returns that are usually in monetary form, from financial assets (interest and dividends), non-financial assets (rents) and royalties;*
- *Interest receipts are payments received from bank accounts or other financial institutions, certificates of deposit, government bonds/ loans, securities, debentures and loans to non-household members;*
- *Dividends are receipts from an investment in a company where the investor is not involved in the company's activities. This includes silent partners. It also includes pensions and annuities in the form of dividends from voluntary private insurance schemes;*
- *Rent is payment received for the use of assets such as land and houses;*
- *Royalties are incomes obtained from the services of patented or copyrighted materials, for example such as writing rights, copyrights for song compositions and others; and*
- *Imputed rent is assessed for homes occupied by its owners.*

**d) Current Transfers Received**

*Transfers can consist of cash, goods or services. Transfers can be made between households to other households, between the government and households, or between households and charities. These receipts can be both within or outside the country. The main motivation is to redistribute income either by the government (e.g. educational aid, zakat and Bantuan Prihatin Rakyat (BPR)/ Bantuan Sara Hidup (BSH)/ Bantuan Keluarga Malaysia (BKM)) or individual/ private (e.g. corporate social responsibility).*

*Current Transfers received directly affect the level of Gross Income and influence the consumption of goods and services. Therefore, all Current Transfers received in the form of cash and goods or services are considered as part of income. However, the Current Transfer does not cover capital transfers.*

**6.5 Gross and Disposable Income**

*Gross income and disposable income are the two main concepts of income used in this report and can be defined as follows:*

**a) Gross Income**

*Gross income is the total amount of income earned by the household from all sources of income as stated in item 6.4.*

**b) Disposable Income**

*Disposable income is the household's gross income after deducting current transfers paid such as direct taxes, contributions to other households, zakat payments, other current transfers paid and current transfer received in the form of in-kind. This concept of disposable income reflects the real income of the household against current consumption and savings.*

*For the purposes of this survey, the effect of the distribution of public expenditure (collective expenditure) is not taken into account due to the difficulty in evaluating the benefits obtained as part of household income.*

## **6.6 Household Income**

*Household income is the amount of income usually received (accrued) by household members, in the form of cash or goods received repeatedly during the survey's reference period (within a year or more frequently).*

## **6.7 Income Recipient**

*Income recipient refers to household members who receive income from any source (as per item 6.4) during the reference period. A household can have more than one income recipient.*

## **6.8 Ethnic Group**

*The ethnic groups of Malaysian citizens are categorised as follows:*

- a) *Bumiputera;*
- b) *Chinese;*
- c) *Indian; and*
- d) *Others.*

## **6.9 Highest certificate obtained**

*Refers to the highest certificate obtained from a public or private educational institution that provides formal education. The highest certificate obtained is classified according to the International Standard Classification of Education (ISCED):*

### **a) PMR or Equivalent**

*Refers to Penilaian Menengah Rendah, Sijil Rendah Pelajaran, Lower Certificate of Education, Sijil Rendah Agama, Pentaksiran Tingkatan Tiga or equivalent.*

### **b) SPM or Equivalent**

*Refers to Sijil Pelajaran Malaysia or equivalent (Senior Cambridge Certificate, GCE O Level and Sijil Pelajaran Vokasional Malaysia). This includes basic skills certificates obtained from specialised and technical skills training institutions where the study period is at least six months such as the GIATMARA certificate.*

**c) STPM or Equivalent**

*Refers to Sijil Tinggi Persekolahan Malaysia, Higher School Certificate, or equivalent qualifications (Sijil Tinggi Agama and GCE A Level).*

**d) Certificate**

*Refers to certificates obtained from colleges, polytechnics or other institutions that offer formal education. The certification period should not be less than six months.*

**e) Diploma**

*Refers to diplomas and equivalent certificates obtained from universities, colleges, schools or polytechnics prior to a degree qualification.*

**f) Degree**

*Refers to a degree (Bachelor's Degree, Master's or Doctor of Philosophy) obtained from a public or private higher education institution or equivalent.*

**g) No Certificate**

*Refers to those who are still in school or have finished school without obtaining any certificate.*

### **6.10 Occupation**

*Occupation is classified according to the Malaysia Standard Classification of Occupation (MASCO) 2020 classification developed by the Ministry of Human Resources (MOHR) based on the International Standard Classification of Occupations (ISCO).*

*For a person who has more than one job, only the job that takes the most time during the reference period is considered his main job. If the working time of each job is the same, then the job that provides the highest income is the main job. In cases where the length of employment and income are the same for each job, the job in which he has worked the longest is considered his main job.*

### **6.11 Industry**

*Individual main occupation industry is classified according to the Malaysian Standard Industrial Classification (MSIC) 2008 which is based on the International Standard Industrial Classification of All Economic Activities (ISIC) Revision 4.*

## **7. SAMPLING FRAME**

- 7.1** *The framework used for the HIS & BA 2022 sample selection is based on the Household Sampling Framework which consists of Enumeration Blocks (EBs) created for the 2020 Population and Housing Census which is updated from time to time. EB is an area of the earth's surface created to carry out survey operations which on average contains between 80 to 120 LQs. All EBs are formed within gazetted boundaries that are within administrative districts, sub-districts or local authority areas.*
- 7.2** *EB in the sampling framework is classified according to urban and rural areas. Urban areas are defined as used in the 2020 Population and Housing Census. An urban area is a gazetted area and a built-up area bordering it, and the combination of these two areas has a population of 10,000 or more at the time of the 2020 Population and Housing Census. Other areas, which are gazetted and have a total population of less than 10,000 people and non-gazetted areas, are classified as rural areas.*
- 7.3** *Built-up areas are regions adjacent to gazetted areas and have at least 60 per cent of the population (aged 15 years and above) engaged in non-agricultural activities.*
- 7.4** *The definition of urban areas also takes into account special development areas, which are development areas that are not gazetted and can be identified and separated from gazetted areas or areas with built-up areas exceeding five kilometres and having a population of at least 10,000 people with 60 per cent of the population (aged 15 years and above), who are involved in non-agricultural activities.*
- 7.5** *Urbanisation is a dynamic process that is constantly evolves with progress and development. Consequently, the urban areas identified in 2010 and 2020 Population and Housing Censuses may not necessarily refer to the same locations, as areas meeting the urban criteria will continue to expand and develop over time.*

**7.6** *The classification of the area according to the strata used is as follows:*

<b>Strata</b>	<b>Population of gazette, adjoining built-up areas and special development area</b>
<i>Metropolitan</i>	<i>75,000 and more</i>
<i>Urban large</i>	<i>10,000 to 74,999</i>
<i>Urban small</i>	<i>1,000 to 9,999</i>
<i>Rural</i>	<i>All other areas</i>

**7.7** *For sampling purposes, the classification of areas as in point 7.6 is used for all states and Federal Territories. For Sabah and Sarawak, given the problem of difficulty in accessing the interior, the rural strata were further developed based on the length of time it took to reach a place from the nearest urban centre.*

**7.8** *For the purpose of tabulating the report, the strata are listed as follows:*

*Urban = Metropolitan + Urban large*

*Rural = Urban small + All rural*

## **8. SAMPLE DESIGN**

**8.1** *A two-stage stratified sampling design was used in HIS & BA 2022. The formation of the strata is as follows:*

<i>Primary strata</i>	<i>Covered all states in Malaysia</i>
<i>Secondary strata</i>	<i>Covered administrative districts for all states in Malaysia</i>
<i>Tertiary strata</i>	<i>Covering urban and rural strata as stated in point 7.8</i>

**8.2** *Sample selection is performed at the EB stage using the systematic random sampling method. Next, the LQ sample is selected from the selected EB using the same method, generating random numbers and setting the selection interval to ensure equal probability of selection for each LQ. This systematic and scientific procedure is carried out to generate an unbiased sample that can represent the entire population of households in Malaysia.*

## 9. SAMPLE SIZE

**9.1** The sample size of HIS & BA 2022 needs to represent the population according to the requirements of the analysis level set. This sample size has taken into account the following elements:

- i) Findings from the previous survey HIS & BA 2019;
- ii) Sampling design; and
- iii) Margin of error.

**9.2** Estimated sample size is calculated within each stratum (administrative districts) and substratum (urban and rural). The sample size calculation takes into account the mean income, a 95 per cent confidence level, relative standard error, design effect and specified response rate.

**9.3** The sample size calculation for subpopulation  $j$ ,  $n_{1j}$  is calculated using the following formula:

$$n_{1j} = \frac{n_{0j}}{1 + \frac{n_{0j}}{N_j}} \quad ; j = 1, 2, 3, \dots, k$$

where:

$$n_{0j} = \frac{\sigma^2}{(RSE \times \mu)^2}$$

To meet the assumptions in Stratified Sampling, the design effect factor (D.E.) is taken into account:

$$D.E. = \frac{\text{variance for complex sample}}{\text{variance for SRS}}$$

Sample size considering D.E. for subpopulation  $j$ ,  $n_{2j}$  is given by:

$$n_{2j} = n_{1j} \times D.E.$$

And then, taking into account the response rate of the last survey, the overall sample size for sub-population  $j$ ,  $n_{3j}$  is as follows:

$$n_{3j} = n_{2j} \times \frac{1}{\text{Response Rate}}$$

So, the total sample size,  $n$  is given by:

$$n = \sum_{j=1}^k n_{3j}$$

where:

$n_{0j}$  the basic sample size obtained consider the Finite Population Factor (FPC) for subpopulation  $j$

$n_{1j}$  sample size that takes into account population factors for subpopulation  $j$

$n_{2j}$  sample size that takes into account design effect factors for subpopulation  $j$

$n_{3j}$  sample size that takes into account the response rate factor for subpopulation  $j$

$N$  the number of element units in the population

$n$  total sample size

$\sigma$  standard deviation

RSE relative standard error

$\mu$  mean income from previous survey

#### 9.4 The sample size for HIS & BA 2022 is as follows:

**Table 2: Number of EBs, LQs and Household Response by State, Malaysia, 2022**

State	Number of EB	Number of LQ	Number of Household Response
<b>Malaysia</b>	<b>11,609</b>	<b>92,872</b>	<b>89,253</b>
Johor	955	7,640	7,517
Kedah	789	6,312	6,138
Kelantan	700	5,600	5,177
Melaka	332	2,656	2,504
Negeri Sembilan	409	3,272	3,111
Pahang	601	4,808	4,662
Pulau Pinang	634	5,072	4,693
Perak	919	7,352	7,214
Perlis	205	1,640	1,600
Selangor	1,333	10,664	10,470
Terengganu	564	4,512	4,299
Sabah	1,464	11,712	11,507
Sarawak	1,785	14,280	13,516
W.P. Kuala Lumpur	729	5,832	5,387
W.P. Labuan	91	728	716
W.P. Putrajaya	99	792	742

## **10. ESTIMATION**

*In the estimation procedure, a weight (non-response weight) is used to account non-response cases. The original weight (design weight) is adjusted by considering non-response rate for each domain or stratum. For example, if 5,000 households are selected but only 4,000 households respond to the survey, the original weight (design weight) will be adjusted to account for a 20 per cent non-response rate. If the original weight (design weight) is 2.0, meaning that one household sample represents two households in the population, then the weight (non-response weight) will be adjusted to 2.5, indicating one household sample represents 2.5 other households.*

## **11. LIMITATION OF THE DATA**

**11.1** *One such limitation is that the household income data covers only the income portion which accrues and received repeatedly in the form of cash or goods during the survey's reference period.*

**11.2** *The income data presented in this report have been obtained through a household survey covering only private households, excluding the institutional households. Furthermore, household income had been used for analysis and the characteristics used (for e.g.: ethnic group, age group, industry group, occupational group and highest certificate obtained) refer to that of the head of household. As such, certain limitations are bound to arise in connection with the use of the income data.*

**11.3** *Analysis of this report refers to the head of households who need not necessary be the main income recipient.*

## 12. DATA EVALUATION

**12.1** *The data obtained from the survey conducted using a probability sample is subject to two types, namely sampling error and non-sampling error.*

**i) Sampling Error**

*Sampling error arises from estimating data obtained from a probability sample and can be assessed by calculating the Relative Standard Error, typically expressed as a percentage. This error serves as an indicator of the accuracy of the estimated parameter under investigation, providing insight into the level of variation between the variables estimated through the survey and the population parameters.*

*For example, findings from the HIS & BA 2022 revealed that the average monthly household gross income for Johor is RM8,517 with a Relative Standard Error of 1.1 per cent. In other words, the Standard Error value is RM98. Based on a 95 per cent confidence interval ( $\alpha=0.05$ ), the average monthly household gross income falls within the range of RM8,326 to RM8,708 per month.*

**ii) Non-Sampling Error**

*These errors can arise due to incomplete survey coverage, weakness in the survey framework, errors in feedback, non-responses, and mistakes during processing stages such as editing, coding and data capture. To maintain a high level of the data quality, various administrative measures have been implemented to minimize non-sampling errors. These measures include intensive training provided to supervisors and enumerators, as well as close supervision and random checks conducted on households covered by enumerators to ensure the accuracy and validity of the recorded information.*

*To overcome cases of no response resulting from several reasons such as empty LQ, no resident at home, refusal to cooperate or LQ not eligible to be covered in the survey, the sample size estimation of HIS & BA 2022 has taken into account all these possibilities.*

*The updating of the sampling frame implemented from time to time has been able to reduce the non-response rate caused by empty LQ. Extensive publicity is carried out through electronic media and print media to reduce cases of no residents at home and refusing to cooperate.*

*In addition to that, at the data processing level, consistency checks for each variable and validation processes have been systematically implemented to minimise all non-sampling errors.*

### **13. LIMITATION ANALYSIS**

*The findings of HIS & BA 2022 found that the precision of the mean monthly household gross income by administrative district possesses a high degree of reliability level. For example, the mean monthly household gross income Batu Pahat is RM7,419 with a relative standard error of 2.4 per cent. In other words, the standard error is RM176. Based on the 95 per cent confidence interval ( $\alpha=0.05$ ), the mean monthly household gross income of Batu Pahat is within the range of RM7,704 to RM7,764 per month. Detailed analysis of income data by administrative district level is based on the relative value reliability of not more than 20 per cent tolerance interval.*

### **14. THRESHOLD INCOME FOR HOUSEHOLD GROUP BY INCOME**

#### **14.1 Household Group by Income**

*Threshold of monthly household income by household group for Top 20 per cent (T20), Middle 40 per cent (M40) and Bottom 40 per cent (B40) for each strata, ethnic group and state are as follows:*

**Table 3: Thresholds of Monthly Household Gross Income by Household Group and Strata, Malaysia, 2022**

Strata	Income Thresholds (RM)		
	Bottom 40%	Middle 40%	Top 20%
<b>Malaysia</b>	<b>&lt; 5,250</b>	<b>5,250 - 11,819</b>	<b>≥ 11,820</b>
Urban	< 6,030	6,030 - 12,899	≥ 12,900
Rural	< 3,510	3,510 - 7,039	≥ 7,040

**Table 4: Thresholds of Monthly Household Gross Income by Household Group and Ethnic Group, Malaysia, 2022**

Ethnic Group	Income Thresholds (RM)		
	Bottom 40%	Middle 40%	Top 20%
Bumiputera	< 4,860	4,860 - 10,679	≥ 10,680
Chinese	< 6,650	6,650 - 14,689	≥ 14,690
Indian	< 5,580	5,580 - 11,989	≥ 11,990
Others	< 3,889	3,890 - 7,699	≥ 7,700

**Table 5: Thresholds of Monthly Household Gross Income by Household Group and State, Malaysia, 2022**

State	Income Thresholds (RM)		
	Bottom 40%	Middle 40%	Top 20%
<b>Malaysia</b>	<b>&lt; 5,250</b>	<b>5,250 - 11,819</b>	<b>≥ 11,820</b>
Johor	< 5,740	5,740 - 11,919	≥ 11,920
Kedah	< 3,750	3,750 - 7,429	≥ 7,430
Kelantan	< 3,060	3,060 - 6,469	≥ 6,470
Melaka	< 5,220	5,220 - 11,169	≥ 11,170
Negeri Sembilan	< 4,329	4,330 - 9,509	≥ 9,510
Pahang	< 4,140	4,140 - 7,799	≥ 7,800
Pulau Pinang	< 5,580	5,580 - 11,489	≥ 11,490
Perak	< 3,790	3,790 - 7,919	≥ 7,920
Perlis	< 4,090	4,090 - 7,789	≥ 7,790
Selangor	< 8,390	8,390 - 15,729	≥ 15,730
Terengganu	< 5,150	5,150 - 9,229	≥ 9,230
Sabah	< 3,840	3,840 - 8,529	≥ 8,530
Sarawak	< 4,160	4,160 - 9,209	≥ 9,210
W.P. Kuala Lumpur	< 8,880	8,880 - 16,779	≥ 16,780
W.P. Labuan	< 6,020	6,020 - 10,799	≥ 10,800
W.P. Putrajaya	< 8,970	8,970 - 18,319	≥ 18,320

**Table 6: Thresholds of Monthly Household Disposable Income by Household Group and Strata, Malaysia, 2022**

Sabah	< 3,350	3,350 - 7,389	≥ 7,390
Sarawak	< 3,580	3,580 - 7,979	≥ 7,980
W.P. Kuala Lumpur	< 7,130	7,130 - 13,349	≥ 13,350
W.P. Labuan	< 4,810	4,810 - 8,749	≥ 8,750
W.P. Putrajaya	< 7,960	7,960 - 15,049	≥ 15,050

### 14.2 Quintile Income Group

The value obtained from dividing the data sorted by magnitude into five equal parts is called quintile. Using this method, households were sorted by income in ascending order. Quintiles divide households into five equal groups (from lowest to highest) where each group represents 20 per cent or one fifth of all households.

### 14.3 Decile Income Group

The income decile group is the tenth order of households which is ordered from minimum to maximum. The first decile group is the first decile (10 per cent of all households with the lowest income). The last decile is the tenth of households with the highest income.

## 15. COMPOUNDED ANNUAL GROWTH RATE

The calculation of the compounded annual growth rate is based on the exponential function as follows:

$$\text{CAGR} = \frac{\ln\left(\frac{Y_t}{Y_0}\right)}{t} \times 100$$

where;

CAGR	compounded annual growth rate
$Y_t$	monthly household income of the current year
$Y_0$	monthly household income of the previous year
$t$	period between the current year and the previous year

## 16. ROUNDING OF ESTIMATE

Counts for a category may not always be the same between tables due to arbitrary rounding. However, this difference is not significant.

The percentages shown in the table are obtained from actual figures and do not necessarily give an even number of 100 per cent due to rounding, although the number shown is 100 per cent.

## **17. NOTES AND SYMBOLS**

<i>0.0</i>	<i>Less than half the smallest unit shown. For example, less than 0.05 per cent</i>
<i>-</i>	<i>Nil/ blank/ no case</i>
<i>W.P.</i>	<i>Wilayah Persekutuan</i>
<i>RM</i>	<i>Ringgit Malaysia</i>
<i>n.a.</i>	<i>Not applicable</i>
<i>n.s.</i>	<i>Not significant</i>
